### **Last pages: Membership Application Forms**

Cover photograph: *The Wallcreeper* *Tichodroma muraria* breeds in mountains of S & E Europe (Spain and S France E, including Corsica, to Italy, Balkans, Caucasus, S & E Turkey) E to N & W Iran, mountains from Turkmenistan and E Iran, E to Kazakhstan, W Mongolia and, in S, to Himalayas and N, C & E China. Several birds usually spend the winter in Cyprus: most regularly in the Avakas Gorge and sometimes on nearby cliffs or gorges in the Akamas peninsula and Kensington Cliffs. In the past there have also been reports of sightings from the Baths of Aphrodite area. At least two are in the Avakas Gorge this winter and Dave Walker photographed this individual at the end of November 2016.

---

## **Important announcement regarding changes to the BirdLife Cyprus Management**

We are pleased to announce the appointment of Martin Hellicar, our longest-serving employee, as the new BirdLife Cyprus Director, following the departure through mutual agreement of Dr. Claire Papazoglou from her role as Director, on 1 November 2016. We would like to thank Claire for all her efforts in bringing BirdLife Cyprus to where it is today and wish her all the best for the future.

Martin took up his new role at the beginning of December 2016.

Looking ahead, and under Martin's leadership, we are confident of building on our achievements of recent years and of our ability to continue to grow within the BirdLife partnership. We aim to achieve this in cooperation with our key partners and collaborators, but also with the invaluable support of our members, the driving force that helps us reach our vision and achieve our mission to protect the wild birds of Cyprus, their habitats and wider biodiversity.

From everyone here at BirdLife Cyprus we would like to wish Martin every success in his new role!

## **Σημαντική ανακοίνωση – Αλλαγές στη διοίκηση του Πτηνολογικού Συνδέσμου Κύπρου**

Βρισκόμαστε στην ευχάριστη θέση να ανακοινώσουμε τον διορισμό του Μάρτιν Χέλλιχαρ, στη θέση του Διευθυντή μετά από την αποχώρηση (με αμοιβαία συμφωνία) της Δρ. Κλαίρης Παπάζογλου από τον ρόλο της ως Διευθύντρια του Πτηνολογικού, από την 1η Νοεμβρίου 2016. Ο Μάρτιν, που αριθμεί τα περισσότερα χρόνια υπηρεσίας στον οργανισμό, ανέλαβε καθήκοντα Διευθυντή από τον Δεκέμβριο 2016. Με αυτή την ευκαιρία ο Πτηνολογικός θα ήθελε να ευχαριστήσει την Κλαίρη για όλες τις προσπάθειές της να φέρει τον οργανισμό στο επίπεδο που βρίσκεται σήμερα και να της ευχηθεί ό,τι καλύτερο για το μέλλον.

Κοιτάζοντας μπροστά, και κάτω από την καθοδήγηση του Μάρτιν, είμαστε σίγουροι ότι θα συνεχίσουμε να χτίζουμε πάνω σε ό,τι πετύχαμε τα τελευταία χρόνια καθώς και στην ικανότητά μας να συνεχίζουμε να δυναμώνουμε εντός του BirdLife. Αυτό στοχεύουμε να το επιτύχουμε σε συνεργασία με τους βασικούς εταίρους και συνεργάτες μας, αλλά επίσης και με την πολύτιμη υποστήριξη από τα μέλη μας, την κινητήρια δύναμη που συμβάλει στην επίτευξη του οράματός μας και στην διεκπεραίωση της αποστολής μας: την προστασία των άγριων πουλιών της Κύπρου, των οικοτόπων τους και της ευρύτερης βιοποικιλότητας.

Από όλους εδώ στον Πτηνολογικό ευχόμαστε στον Μάρτιν κάθε επιτυχία στον νέο του ρόλο!

---

**Birdline** Operated by June Neal on behalf of BirdLife Cyprus is the bird information hotline. To hear a pre-recorded message with recent interesting bird sightings and to add your own observations, please phone 00357 25 934076.

Join the [BirdLife Cyprus Google](https://groups.google.com/forum/#!forum/birdlifecyprusbirds) group to exchange and receive emails updating local and visiting birders about recent sightings <https://groups.google.com/forum/#!forum/birdlifecyprusbirds>

## **BIRDTRACK UPDATE: CYPRUS PORTAL NOW AVAILABLE**

*Jane Stylianou*

Since February 2016 users can now access the BirdTrack bird recording system via the Cyprus Portal. Instead of entering the system via the Global Portal as you had been doing, please now use the following link [blc.birdtrack.net](http://blc.birdtrack.net) and remember to update your bookmark.

Through the Cyprus portal, there is now a Gazeteer of the most frequently used birding sites in Cyprus which new users will find especially useful. More features will be added over the coming months.

Any problems or for further details please contact Jane Stylianou [janestycy@yahoo.co.uk](mailto:janestycy@yahoo.co.uk) mobile: 99558953.

---

## **KEEP UP TO DATE AND SHARE RECENT SIGHTINGS WITH THE BIRDLIFE CYPRUS GOOGLE GROUP**

Continuing BirdLife Cyprus' attempts to ensure both resident and visiting birders receive up to date information on the birds being spotted on the island, we have set up a Google Group through which group members can email in their recent sightings and bird news and receive and read those of other members.

If you would like to join please [click here](#).

Email: [BirdLifeCyprusBirds@googlegroups.com](mailto:BirdLifeCyprusBirds@googlegroups.com)

Once you are a member you can choose whether to receive all emails or check the news via the web at a time convenient to you. Visit the settings option to ensure that you get emails if you want to. It is an informal group for birders to share what is around. It cannot be checked for accuracy or be held responsible for misinformation. The group is open to both BirdLife Cyprus members and non-members alike. If you know a non-member or friend who may be interested please let them know.

Any news will also be shared with the BirdLife Cyprus BirdLine 25 934076 and the BirdLife Cyprus [Recent sightings page](#) of the website. You can also use these two resources to find out what is around if you don't want to join the Google group.

In addition, do not forget to make your records count by submitting your bird records to the BirdLife Cyprus Recorder and adding them to the country database. Use the [Cyprus portal of BirdTrack](#), download [our reporting excel](#) or email the BirdLife Cyprus Recorder, Jane Stylianou [janestycy@yahoo.co.uk](mailto:janestycy@yahoo.co.uk)

---

**YOUR BIRDING SIGHTINGS ARE IMPORTANT.**  
**PLEASE DON'T FORGET TO SEND THEM TO THE RECORDER**

*Jane Stylianou*

Whether you go out bird watching regularly or just enjoy noting what you see when out on a walk, any record of what you see is important to help us keep an up to date database of the birds of Cyprus.

Most people submit their records on a monthly basis. To be included in the Systematic List that appears in the Monthly Checklist please make sure that Jane receives your records by the 10<sup>th</sup> of the following month or are added to BirdTrack by that date. But don't worry if you miss the deadline; your sightings will still be added to the database and be used in compiling the annual Cyprus Bird Report. On occasions, you may be asked to provide extra details of rarer birds or of those seen out of season or away from their usual locations. This is something that happens to all observers and is not a reflection on anyone's bird watching skills! A list of the species for which a Rare Bird Report is required can be obtained from Jane.

There are several ways to make sure that your records count by submitting them to the BirdLife Cyprus Recorder, Jane Stylianou who will add them to the country database:

Use the Cyprus portal of BirdTrack <http://blc.birdtrack.net> or download our [reporting excel](#). The recorder is happy to receive your sightings by email but where possible please try to use either BirdTrack or the Excel form. Please contact her if you have any questions [janestytcy@yahoo.co.uk](mailto:janestytcy@yahoo.co.uk) mobile telephone 99558953.

Οι καταγραφές σας είναι σημαντικές για μας για να μπορέσουμε να κρατήσουμε τη βάση δεδομένων για τα πουλιά της Κύπρου ενημερωμένη. Για να συμπεριληφθούν οι καταγραφές σας στον Μηνιαίο Συστηματικό Κατάλογο παρακαλούμε συμπληρώστε [το έντυπο αυτό](#) και στείλτε το στην Jane την Υπεύθυνη Καταγραφών, μέχρι τις 10 του επόμενου μήνα ή ανεβάστε τις καταγραφές σας στο [BirdTrack](#) μέχρι εκείνη την ημερομηνία. Μην ανησυχείτε όμως εάν χάσετε την προθεσμία. Οι καταγραφές σας θα προστεθούν στη βάση δεδομένων και θα χρησιμοποιηθούν στην Ετήσια Ορνιθολογική Αναφορά.

Για οποιαδήποτε διευκρίνιση επικοινωνήστε με την Jane στο [janestytcy@yahoo.co.uk](mailto:janestytcy@yahoo.co.uk) ή στο 99558953.

---

**COMPILATION OF MONTHLY CHECKLIST**

*The Monthly Checklist and Society News is compiled by John Stapley and Dave Walker.*

*Any suggestions concerning subjects for future inclusion gratefully received, as are photographs of any recent sightings. Photographs of recent sightings for inclusion in the Systematic List should be sent to Jane Stylianou by 18<sup>th</sup> of the month. Please send to [janestytcy@yahoo.co.uk](mailto:janestytcy@yahoo.co.uk)*

We would love to hear from members and friends who would like to provide bird and bird watching related articles in future editions of the Monthly Checklist. Get in touch and let us know your ideas. Suggestions for topics could include ID pointers, great locations to visit, birding walks or drives or interesting personal birding experiences that you feel fellow readers would enjoy. Please contact John Stapley [johnstapley8@gmail.com](mailto:johnstapley8@gmail.com) or Dave Walker 99915907 [davidwalker@cytanet.com.cy](mailto:davidwalker@cytanet.com.cy)

If you are sending photographs for inclusion in the Systematic List please send them by 18<sup>th</sup> of the month to Jane Stylianou. Every effort is made to ensure that the work of as many contributors as possible is used but inclusion cannot be guaranteed. Please send photographs in JPEG format where possible. Please send to [janestytcy@yahoo.co.uk](mailto:janestytcy@yahoo.co.uk). Telephone: 99558953

## **SCHEDULE OF BIRDLIFE CYPRUS FIELD MEETINGS AND ACTIVITIES**

### **Winter 2016 – Spring 2017**

*For field trips, please don't forget your flask of coffee and sandwiches*

*Although their higher clearance is an advantage, 4x4s are not necessary for any of the field trips unless **stated otherwise** below.*

*The schedule of field trips is drawn up well in advance of the actual dates. The schedule will only change due to an extraordinary event. However, it is sometimes necessary to assign a different leader.*

***Please note certain field trips require pre booking with the leader to ensure there are suitable conditions at the site for the time of year and sufficient participation (These will be marked Pre Book). Participants in field trips are always advised therefore to check with the BirdLife Cyprus website in case of any late changes or cancellations.***

*Whilst BirdLife Cyprus does not charge for attending field trips, any voluntary donation to its conservation work would be very welcome. Please present your gift to the leader on the day.*

*To assist new members and visiting birders, who have access to a GPS or Google Earth, to locate our 'meeting points more easily', **we have introduced coordinates into the following schedule.** Simply copy and paste the coordinates into the "Search bar" in "Google Earth" and click on it. For most instruments it is unnecessary to type in the degree and minute symbols (° & ') or the N and E letters.*

***Important Announcement:*** Participation in BirdLife Cyprus field meetings is at one's own risk. BirdLife Cyprus accepts no liability or responsibility for accidents, illness, injury or loss or damage to property that might occur. Field trips require light to moderate exercise. Please contact the field trip leader for more information on difficulty, distances and terrain of a particular field trip.

***Σημαντική Ανακοίνωση:*** Η συμμετοχή σας στις εξορμήσεις του Πτηνολογικού Συνδέσμου γίνεται με δική σας ευθύνη. Ο Πτηνολογικός Σύνδεσμος Κύπρου δεν φέρει καμία ευθύνη για τυχόν ατυχήματα, ασθένειες, απώλειες ή ζημιές σε προσωπικά αντικείμενα. Οι εξορμήσεις απαιτούν ελαφριά με μέτρια άσκηση. Παρακαλούμε επικοινωνήστε με τον εκάστοτε υπεύθυνο εξορμήσεων για περισσότερες πληροφορίες που σχετίζονται με το βαθμό δυσκολίας, αποστάσεις και συνθήκες των εξορμήσεων.

#### • **January 2017**

##### **Saturday 7<sup>th</sup> January: Akrotiri Peninsula**

Leader: June Neal. Home Tel: 25932008, Mobile: 99918665

Wintering gulls, waterfowl and passerines.

Meet at 9.00 am, car park adjacent to the new hide at Zakaki ponds off the road to Lady's Mile. Note this meeting point is near the one used some years ago before the drainage works commenced. 34° 38.57' N, 33° 00.23' E

##### **Saturday 7th January: New Year get-together**

Join us for lunch at Oasis Restaurant, Lady's Mile after the field trip. If not attending the field trip at 12.30pm. Please contact Loria Phylaki for more details, Mobile: 99413383

email: [loriaph@gmail.com](mailto:loriaph@gmail.com) 34° 38.36' N, 33° 00.57' E

##### **Saturday 21<sup>st</sup> January: Larnaca Sewage Works**

###### **PLEASE PRE BOOK WITH LEADER**

Leader: Martin Hellicar. Mobile: 99907893

Wintering gulls and waterfowl.

Meet at 9.00 am, dirt track leading to Larnaca Sewage Pool hide. 34° 51.61' N, 33° 37.64' E

**Saturday 28<sup>th</sup> January: Akrotiri Peninsula**

Leader: June Neal. Tel: 25932008, Mobile: 99918665

Waterbirds and other winter visitors.

Meet at 9.00 am, Phassouri Reed beds. 34° 37.964' N, 32° 56.05' E

• **February 2016**

**Saturday 11<sup>th</sup> February: Larnaca Sewage Works, Seafront and (possibly) Oroklini Marsh  
PLEASE PRE BOOK WITH LEADER**

Leader: Stavros Christodoulides. Mobile: 99425050

Wintering gulls and waterfowl.

Meet at 9.00 am, dirt track leading to Larnaca Sewage Pool hide. 34° 51.61' N, 33° 37.64' E

**Saturday 18<sup>th</sup> February: Paphos Foothills**

Leader: to be confirmed

Winter thrushes and finches.

Meet at 9.00 am, roundabout Paphos end of motorway, lay-by at "Konia" exit.

34° 47.09' N, 32° 26.74' E

• **March 2016**

**Saturday 4<sup>th</sup> March: Akhna Dam & Oroklini Marsh  
PLEASE PRE BOOK WITH LEADER**

Leader: Stavros Christodoulides. Mobile: 99425050

Late winter visitors, early spring migrants and waterbirds

Meet 09.00 am west end of Akhna Dam Wall. 35° 03.25' N, 33° 48.91' E

**Wednesday 8<sup>th</sup> March: Akrotiri Peninsula**

Leader: June Neal. June Neal. Home Tel: 25932008, Mobile: 99918665

Late winter visitors, water birds and spring migrants

Meet 8.30 am, (Please note the earlier start time) Viewing hide at Zakaki Marsh.

34° 38.57' N, 33° 00.23' E

**Saturday 18<sup>th</sup> March: Paphos Lighthouse**

Leader: to be confirmed

Early Spring migrants

Meet 8.30 am (please note the earlier start time), Entrance of Archaeological area by the Paphos Harbour Car Park.

34° 45'36' N, 32° 24.51' E

**Saturday 25<sup>th</sup> March: Larnaca Sewage Works & Oroklini Marsh  
PLEASE PRE BOOK WITH LEADER**

Leader: Martin Hellicar. Mobile: 99907893.

Spring migrants and waterbirds

Meet 9.00 am, Larnaca Sewage Works Hide. 34° 51.61' N, 33° 37.64' E

• **April 2016**

**Saturday 1<sup>st</sup> April: Asprokremmos Dam and Mandria**

Leader: Alan Crane, Mobile: 99276310

Spring migrants.

Meet at 9.00 am, Asprokremmos Dam car park. 34° 43.666' N, 32° 33.14' E

### **Friday 7th - Sunday 9<sup>th</sup> April: Karpas Peninsula**

Spring migrants and rare residents

Leader: Melis Charalambides. Home Tel: 22632155, Mobile: 99653205

Details will follow. Meet 11.00 am west end of Akhna Dam Wall. 35° 03.25' N, 33° 48.91' E

**Please book in advance with Melis Charalambides. Note, there is a 50 euro deposit on each booking**

### **Friday 14<sup>th</sup> April - Monday 17<sup>th</sup> April (Cypriot Easter)**

#### **Saturday 22<sup>nd</sup> April: Cape Greko**

##### **PLEASE PRE BOOK WITH LEADER**

Leader: Stavros Christodoulides. Mobile: 99425050

Spring migrants

Meet 7.30 am, Kermia Beach Hotel turn-off (please note earlier start time).

34° 58.54' N, 34° 02.46' E

Meet 9.30 am, Kermia Beach Hotel turn-off (a second meeting time for those unable to make the earlier one)

#### • **May 2016**

#### **Saturday 6<sup>th</sup> May: Kannaviou Dam & Paphos Forest**

Leaders Dave and Jan Walker, Tel: Mobile: 99915907

Resident raptors, recent migrants and water birds.

Meet 9.00 am, Stroumbi, Esso Petrol Station, opposite turn off to Polemi.

34° 52.62' N, 32° 28.947' E

#### **Saturday 13<sup>th</sup> May: Akrotiri Peninsula.**

Leader: June Neal. Home Tel: 25932008, Mobile: 99918665

Late spring migrants and water birds.

Meet 8.30 am, (please note the earlier start time), Akrotiri Marsh (Phassouri Reed-beds).

34° 37.964' N, 32° 56.05' E

## **FIELD TRIP – AYIOS SOZOMENOS & ATHALASSA – 19<sup>th</sup> NOVEMBER 2016**

*By Martin Hellicar*

What began as a 'trial' field trip has become a major attraction: 21 people turned up on this sunny November morning. A total of 41 bird species, including 17 waterbirds, were recorded at the two sites, so it was well worth the trip (even for those who came from far-away Paphos!).

On route to Ayios Sozomenos, we picked up **Water pipit**, **Fan-tailed Warbler**, **Stonechat**, **Crested Lark** and **Meadow Pipit** in the clover fields. We arrived at the abandoned village of Ayios Sozomenos around 09:15 and wandered around the ruins, where we found dozens of **Jackdaws**, **White Wagtail**, **Chaffinches**, **Kestrel**, **Hooded Crow**, **Robin**, **Sardinian Warbler**, **Black Redstart**, **Spectacled Warbler**, **Spanish Sparrow** and **Great Tit**. But our main target species of **Finch's Wheatear** we did not spot till we explored the cliffs to the S of the village. A **Blue Rock Thrush** was also seen on the cliffs, while the surrounding fields offered a lone **Hen Harrier**, a flock of around 50 **Northern Lapwings** and good numbers of **Skylarks**.

We moved on from Ay. Sozomenos at around 11:30 and headed for Athalassa Park and its small reservoir. Water levels were reasonable (around 50% full) given the recent drought and we picked up good numbers – and a nice variety – of waterbirds: 14 **Little Grebes**, 4 adult and 2 juvenile

**Grey Herons**, 3 **Night Herons** (two adults and a juv.), 1 sleepy juvenile **Spoonbill**, 1 **Little Egret**, 1 **Cattle Egret** and 3 **Great Egrets**, 14 **Moorhens**, 8 **Coots**, an impressive flock of **Cormorants** (around 100 in number), no fewer than 4 **Kingfishers**, two **Black-winged Stilts**, 4 **Snipe**, 7 **Teal**, 16 **Mallard**, a **Water Rail** and a **Grey Wagtail**. We also added **Woodpigeons**, **Chiff-chaffs** and **Cetti's Warblers** to the trip list.

### FIELD MEETING REPORT- TROODOS – 26th NOVEMBER 2016

*by Dave & Jan Walker*

The meeting point was at the Visitor Centre of the Troodos National Forest Park, while waiting for all the attendees, 15 in total, we were able to get good views of 2 **Eurasian Blackbird** in a nearby tree and **Eurasian Jay** were flying across the car park. We had a walk around the Centre, there were **European Robin** many **Coal Tit** and a **Short-toed Tree Creeper** seen. Unusually near the end of the short walk we came across a **Grey Wagtail** feeding on the paving next to the Visitor Centre with no running water in the area. We moved a short distance to the weather station, where recently the rough ground which used to hold rain water in the hollows had now been made into a new asphalt car park. We ventured down the start of the Atlanta trail but it became very busy with groups of hikers so we decided to turn back; as we did, we were rewarded with very good views of a Short-toed Tree Creeper. In the same area were **Common Chaffinch** and Eurasian Jay, also an owl was seen to fly from tree to tree by some but it was unable to be relocated to get an ID. We moved onto Livadi tou Pashia where we had a coffee break; again there were a number of Eurasian Jay and Coal Tit. Good views of a male **Red Crossbill** seen perched on top of a pine tree which was joined by a female shortly afterwards. **Song Thrush**, Eurasian Blackbird and **Mistle Thrush** were also seen. A short trip further down the road to Almyrolivado (Giant Juniper) we were able to see more European Robin, Coal Tit and Eurasian Jay but the highlight had to be the **Winter Wren**. After we had had lunch a **Goldcrest** was spotted in the trees nearby. We then ventured to Platania, where after a short walk more of the same species were seen. As previously, there seemed few birds about so we called it a day. A couple of us stopped off at the Amiantos Mine viewing point on the way back where we were rewarded with at least 4 **Yellowhammer** hiding in small pine trees which really made the day. All in all 12 species seen.

### FIELD MEETING – ASPROKREMMOS DAM, DIARIZOU VALLEY & KIDASI

3rd December 2016

*June Neal*

All 20 people who met at the dam car park were relieved that the previous three days of heavy rain had ended. The day was glorious with excellent visibility. The rain had not made much of an impression on the water levels in the reservoir and the only bird seen was a very distant **Great Crested Grebe**. The trees around the car park provided several interesting views of feeding **Common Chiffchaff**, **Sardinian Warblers**, a **Grey Wagtail** (for Geoff who arrived first), **Common Chaffinches** and **Goldfinches**. A lone **Northern Pintail** flew over. Several **Common Linnet**, a couple of **Great Tit** and a male **Western Redstart** were also in the trees. High, circling **Common Kestrel** were noted and counted, totalling at least nine close to the mast and three to the E. A male **Cyprus Warbler** was seen briefly around the weather centre but not found again. A buzzard species came off the trees to the west and flew towards the tip – a **Long-legged Buzzard** which apparently caught prey as it flew very low, then landed on the nearby mounds, chased by four **Hooded Crow**. The corvids kept jumping at the raptor and fluttering over its head as it ate its meal. The corvid numbers increased with four **Magpie** joining in the mobbing. The buzzard continued to keep a firm hold of its prey, occasionally flapping its wings to discourage the mob. The prey may have been a rat – it looked pretty gross when the buzzard lifted up what was evidently the last morsel – before the bird took flight, chased by the corvids until they realised there was nothing left for them to eat (they did circle back to the mound and checked no titbit was left behind). We watched attentively for at least 10 minutes!

Other species around the fields included **Common Stonechat** (at least two pairs and 2 males), three **White Wagtail** and **Crested Lark**, a couple of **European Robin**, a few **Common Greenfinch** and **House Sparrow**. Overhead many **Western Jackdaw** tumbled about calling loudly. We agreed that the earlier start to the meeting had resulted in more sightings of smaller birds compared with a later start. As we reached the end of the dam wall about 50 **Meadow Pipit** flew high over the fields in an impressive display, with almost translucent wings in the sunlight.

Driving along the Diarizos Valley we stopped to admire another Long-legged Buzzard which obliged with a few hovers before it flew off when a **Peregrine Falcon** flew by. More Stonechats, Goldfinches, Meadow Pipits and Linnets flew around plus at least four male Sardinian Warblers. We stopped to look briefly at the Natura 2000 site, Koilada Diarizou, even though no water was yet in the area. *Alnus orientalis* (Oriental alder) riparian woodland is there and can be host to several passerine species in the autumn and winter. In spring it usually has several breeding pairs of Great Spotted Cuckoo so it was useful to show birdwatchers the area and tracks for future visits.

A welcome coffee or tea, along with freshly baked cakes was a treat at the Xtreme View Cafe, topped off by distant views of soaring **Eurasian Griffon Vulture** – two above the high hills to the E and one along the valley.

Kidasi was bathed in sunshine and we walked along the track uphill (which was not too wet after the recent deluge) and found a male **Finsch's Wheatear**, **Little Owl**, a solitary **Corn Bunting** and many Stonechats. As we were considering returning, three more Griffon Vultures flew towards us, then overhead. Dave managed these dramatic shots of the two flying in formation and then appearing to merge as one. A fourth bird did not come as close but was eventually identified as a **Bonelli's Eagle**. Lunch was interrupted by the appearance of two more Bonelli's Eagle soaring to the N. The final stroll of the afternoon produced another male plus a female Finsch's Wheatear, Robins, Black Redstarts, Chiffchaffs and Sardinian Warblers. Chaffinches and Greenfinches were also heard calling and a distant flock of probable Meadow Pipit.

We all agreed the day had been glorious in all respects and we parted company wishing each other a Merry Christmas and happy birding in 2017. Very many thanks to everyone there, for their excellent contributions and good spirits.

---

## **Electric fence to manage grazing at Akrotiri Marsh**

*by Melpo Apostolidou*

To enhance grazing for conservation purposes at Akrotiri Marsh, the Darwin project has erected an electric fence at the site. The electric fence brings us one step closer to having untethered grazing at Akrotiri Marsh. This change in grazing method will help graziers to manage their cattle and will make their life much easier as they will not have to carry water to tethered animals. It will also help keep the herds of different graziers from mixing and at the same time untethered grazing animals will be doing a much better job at controlling the reed expansion and pushing the reeds further back and therefore creating suitable habitat for wildlife.

The electric fence is a movable fence and has been marked with warning signs. Its voltage is enough to keep cattle away but it is not strong enough to impact human health. However, visitors are advised not to touch the electric fence as it can cause a rather unpleasant feeling.

In case of further information please contact the Project Coordinator on [melpo.apostolidou@birdlifecyprus.org.cy](mailto:melpo.apostolidou@birdlifecyprus.org.cy).

To find out more about the project and its progress, please visit the project website <http://www.akrotirimarsh.org>.

## **BIRD PHOTO QUIZ**

Stavros Christodoulides

PHOTO # 45

### **Last Month's Quiz answer**

Bill shape is key to identifying small passerines, especially "little brown jobs". November's mystery bird has its head turned away making its identification tricky. However, by concentrating on the features that can be seen, we should be able to identify this bird with reasonable ease.

The bird shows brownish-buff upperparts and paler underparts with distinct streaking, bolder at the sides and flanks. Its feet are pinkish while the tail appears rather long and forked. Ironically although its head is turned away from the camera, the pattern on the hindneck and crown are key features in its identification. The bird appears to show alternating dark and light areas with pale median crown and eyebrow stripes and dark lateral crown and eyeline stripes. This pattern, together with the breast streaking is unique to Buntings, a family of birds well represented on our island. Most species occur as winter visitors and passage migrants, some as resident or breeding summer visitors and other species as vagrants. Black-headed, Cretzschmar's, Ortolan, Cinereous and Rock Bunting can be ruled out as these show a different head pattern. Yellowhammer and Pine Bunting can also be ruled out as, amongst other differences, show thicker and more diffuse streaking on the underparts. Reed Bunting can also be ruled out as it has darker brownish-black legs. We are left with just two species, the vagrant Little Bunting, distinguished from its red-brown face and face stripes which are missing from our bird which is a **Corn Bunting**, our commonest and only resident species. Little Buntings can be, a rather localized summer breeder and common and widespread winter visitor.

# BirdLife Cyprus 2017 Calendar

## Birds of the Akamas Peninsula

We are happy to announce the arrival of the new BirdLife Cyprus 2017 calendar which showcases pictures of the birds and habitats of Akamas. This is one of the larger, distinctive and key sites for bird conservation in Cyprus. It is the top breeding site on Cyprus for the European Roller *Coracias garrulus*. It is also a Mediterranean Biome Site with scrub hosting high breeding densities of six endemics. The coastline is important for waterbird passage.

Each photograph is accompanied by information about the species and the photographer. The calendar has a new modern design (dimensions 21.5 X 30.5 cm) and it costs €7 for members and €10 for non-members. You can find the new calendar at our offices or you can place your order by contacting Romina Constantinou, BirdLife Cyprus on 22455072 or at [romina.constantinou@birdlifecyprus.org.cy](mailto:romina.constantinou@birdlifecyprus.org.cy)

## SYSTEMATIC LIST FOR NOVEMBER 2016

Jane Stylianou

3786 bird records received

194 species and forms recorded November 2016, compared to 200 in November 2015.

[Please note, the list has been edited for the purposes of this newsletter and contains records that have not been corrected or corroborated.]

## **MONTHLY WATERBIRD COUNT**

**November 2016**

**Yiannis Christodoulides**

*The BirdLife Cyprus waterbirds monitoring programme has been running since 2005 and covers around 60 wetlands and other waterbird sites around the island. All sites are covered at least every January (mid-winter count) and every May (breeding season count), while the more important sites are also covered in March, September and November. Key Important Bird Area (IBA) wetlands such as the island's two salt lakes, which attract large numbers of birds, are covered on a monthly basis. The monitoring programme is based on the voluntary work of a team of dedicated and experienced recorders and preliminary results are presented in the Monthly Checklist.*

For November, 11 recorders covered 31 wetlands across the island where 6696 birds, of 55 different species were recorded.

The most abundant species was the Black-headed Gull, with over 1500 recorded individuals followed by the Common Coot with almost 1000 individuals and the Eurasian Teal with 800 individuals.

The wetland holding the most birds was the Mia Milia Sewage Works with more than 1800 recorded individuals. Not surprisingly it also had the highest number of recorded species with 26 different species. The Akrotiri sites (Meras, Salt Lake & Lady's Mile) were second in individuals recorded with over 1000, however only 9 species were recorded. The second most species abundant site was the Larnaka Salt Lake with 22 different species recorded.

Water levels are still relatively low in all wetlands, including 6 wetlands being completely dry, however with the recent increase in rain we expect to see an increase in individuals as well.
