ISSN 1986-2938
Cover photo: Many birders head to the Akrotiri Peninsula during autumn migration hoping to spot some of the rarer birds of prey that migrate over the island in with the more commoner species. On October 2nd Keith and Raija Howard and Peter and Ann Chambers spotted this juvenile Levant Sparrowhawk Accipiter brevipes at Phasouri. Keith and Raija spotted it again the following day when Raija was able to get this inflight shot of the bird.

COMPILATION OF MONTHLY CHECKLIST

The Monthly Checklist and Society News is compiled by Dave and Jan Walker.

We would love to hear from members and friends who would like to provide bird and bird watching related articles in future editions of the Monthly Checklist. Get in touch and let us know your ideas. Suggestions for topics could include ID pointers, great locations to visit, birding walks or drives or interesting personal birding experiences that you feel fellow readers would enjoy. Please contact Dave Walker 99915907 davidwalker@cytanet.com.cy

If you are sending photographs for inclusion in the Systematic List please send them by 18th of the month to Jane Stylianou. Every effort is made to ensure that the work of as many contributors as possible is used but inclusion cannot be guaranteed. Please send photographs in JPEG format where possible. Please send to janestycy@yahoo.co.uk. Telephone: 99558953

Birdline Operated by June Neal on behalf of BirdLife Cyprus is the bird information hotline. To hear a pre-recorded message with recent interesting bird sightings and to add your own observations, please phone 00357 25 934076. Join the BirdLife Cyprus Google group to exchange and receive emails updating local and visiting birders about recent sightings https://groups.google.com/forum/#!forum/birdlifecyprusbirds
KEEP UP TO DATE AND SHARE RECENT SIGHTINGS WITH THE BIRDLIFE CYPRUS GOOGLE GROUP

Continuing BirdLife Cyprus' attempts to ensure both resident and visiting birders receive up to date information on the birds being spotted on the island, we have set up a Google Group through which group members can email in their recent sightings and bird news and receive and read those of other members.

If you would like to join please click here.

Email: BirdLifeCyprusBirds@googlegroups.com

Once you are a member you can choose whether to receive all emails or check the news via the web at a time convenient to you. Visit the settings option to ensure that you get emails if you want to. It is an informal group for birders to share what is around. It cannot be checked for accuracy or be held responsible for misinformation. The group is open to both BirdLife Cyprus members and non-members alike. If you know a non-member or friend who may be interested please let them know.

Any news will also be shared with the BirdLife Cyprus BirdLine 25 934076 and the BirdLife Cyprus Recent sightings page of the website. You can also use these two resources to find out what is around if you don’t want to join the Google group.

YOUR BIRDING SIGHTINGS ARE IMPORTANT. PLEASE DON'T FORGET TO SEND THEM TO THE RECORDER

Jane Stylianou

Whether you go out bird watching regularly or just enjoy noting what you see when out on a walk, any record of what you see is important to help us keep an up to date database of the birds of Cyprus.

Most people submit their records on a monthly basis. To be included in the Systematic List that appears in the Monthly Checklist please make sure that Jane receives your records by the 10th of the following month or are added to BirdTrack by that date. But don’t worry if you miss the deadline, your sightings will still be added to the database and be used in compiling the annual Cyprus Bird Report. On occasions, you may be asked to provide extra details of rarer birds or of those seen out of season or away from their usual locations. This is something that happens to all observers and is not a reflection on anyone’s bird watching skills! A list of the species for which a Rare Bird Report is required can be obtained from Jane.

There are several ways to make sure that your records count by submitting them to the BirdLife Cyprus Recorder, Jane Stylianou who will add them to the country database:

Use the Cyprus portal of BirdTrack http://blc.birdtrack.net or download our reporting excel. The recorder is happy to receive your sightings by email but where possible please try to use either BirdTrack or the Excel form. Please contact her if you have any questions janesytcy@yahoo.co.uk mobile telephone 99558953.

Οι καταγραφές σας είναι σημαντικές για μας για να μπορέσουμε να κρατήσουμε τη βάση δεδομένων για τα πουλιά της Κύπρου ενημερωμένη. Για να συμπεριληφθούν οι καταγραφές σας στον Μηνιαίο Συστηματικό Κατάλογο παρακαλούμε συμπληρώστε το έντυπο αυτό και στείλτε το στην Jane την Υπεύθυνη Καταγραφών, μέχρι τις 10 του επόμενου μήνα ή ανεβάστε τις καταγραφές σας στο BirdTrack μέχρι εκείνη την ημερομηνία. Μην ανησυχείτε όμως εάν χάσατε την προθεσμία. Οι καταγραφές σας θα προστεθούν στη βάση δεδομένων και θα χρησιμοποιηθούν στην Ετήσια Ορνιθολογική Αναφορά.

Για οποιαδήποτε διευκρίνιση επικοινωνήστε με την Jane στο janesytcy@yahoo.co.uk ή στο 99558953.
A – Z OF CYPRUS BIRDWATCHING

by June Neal

In future editions of the Monthly Checklist I will begin to compile an A – Z for readers of all levels of experience. The hope is to explain the terminology, describe the species and sites where the birds can be observed. It will be based on reports from various contributors, acknowledged at the end of each section, with short biographies of people who have played a major role in ornithology on the island.

If you have any interesting observations or photos (recent or historic) to contribute to the articles please contact June Neal at chris.june.neal@cytanet.com.cy and I will do my best to include these articles in future editions.

SCHEDULE OF BIRDLIFE CYPRUS FIELD MEETINGS AND ACTIVITIES

The Autumn/Winter/Spring schedule 2017/2018

For field trips, please don’t forget your flask of coffee and sandwiches
Although their higher clearance is an advantage, 4x4s are not necessary for any of the field trips unless stated otherwise below.
The schedule of field trips is drawn up well in advance of the actual dates. The schedule will only change due to an extraordinary event. However, it is sometimes necessary to assign a different leader.

Please note certain field trips require pre booking with the leader to ensure there are suitable conditions at the site for the time of year and sufficient participation (These will be marked Pre Book). Participants in field trips are always advised therefore to check with the BirdLife Cyprus website in case of any late changes or cancellations.

Whilst BirdLife Cyprus does not charge for attending field trips, any voluntary donation to its conservation work would be very welcome. Please present your gift to the leader on the day.

To assist new members and visiting birders, who have access to a GPS or Google Earth, to locate our ‘meeting points more easily’, we have introduced coordinates into the following schedule. Simply copy and paste the coordinates into the “Search bar” in “Google Earth” and click on it. For most instruments it is unnecessary to type in the degree and minute symbols (° & ') or the N and E letters.

Important Announcement: Participation in BirdLife Cyprus field meetings is at one’s own risk. BirdLife Cyprus accepts no liability or responsibility for accidents, illness, injury or loss or damage to property that might occur. Field trips require light to moderate exercise. Please contact the field trip leader for more information on difficulty, distances and terrain of a particular field trip.

Σημαντική Ανακοίνωση: Η συμμετοχή σας στις εξορμήσεις του Πτηνολογικού Συνδέσμου γίνεται με δική σας ευθύνη. Ο Πτηνολογικός Σύνδεσμος Κύπρου δεν φέρει καμία ευθύνη για τυχόν ατυχήματα, ασθένειες, απώλειες ή ζημιές σε προσωπικά αντικείμενα. Οι εξορμήσεις απαιτούν ελαφριά με μέτρια άσκηση. **December 2017**

**Saturday 2nd December: Kidasi**
Leader: June Neal. Home Tel: 25932008, Mobile: 99918665
Griffon Vultures and winter visitors.
Meet at 9.00 am, Asprokremnos Dam car park.
Coordinates: 34° 43.666’ N, 32° 33.14’ E

**Saturday 9th December: Larnaca Sewage Works**
PLEASE PRE BOOK WITH LEADER
Leader: Martin Hellicar. Mobile: 99907893
Wintering gulls and waterfowl.
Meet at 9.00 am, Larnaca Sewage Pool hide.
Coordinates: 34° 51.61’ N, 33° 37.64’ E

**January 2018**

**Saturday 6th January: Akrotiri Peninsula**
Leader: June Neal. Home Tel: 25932008, Mobile: 99918665
Wintering gulls, waterfowl and passerines.
Meet at 9.00 am, car park adjacent to the new hide at Zakaki ponds off the road to Lady’s Mile.
Coordinates: 34° 38.57’ N, 33° 00.23’ E

**Saturday 6th January: New Year get-together**
Join us for lunch at Oasis Restaurant, Lady’s Mile after the field trip.
If not attending the field trip at 12.30pm, Coordinates: 34° 38.36’ N, 33° 00.57’ E
Please contact Loria Phylaki for booking, Mobile: 99413383
e-mail: loriaph@gmail.com

**Saturday 20th January: Larnaca Sewage Works**
PLEASE PRE BOOK WITH LEADER
Leader: Martin Hellicar. Mobile: 99907893
Wintering gulls and waterfowl.
Meet at 9.00 am, dirt track leading to Larnaca Sewage Pool hide.
Coordinates: 34° 51.61’ N, 33° 37.64’ E

**Saturday 27th January: Akrotiri Peninsula**
Leader: June Neal. Tel: 25932008, Mobile: 99918665
Waterbirds and other winter visitors.
Meet at 9.00 am, Phassouri Reed beds.
Coordinates: 34° 37.964’ N, 32° 56.05’ E

**February 2018**

**Saturday 10th February: Akhna Dam & Oroklini Marsh**
PLEASE PRE BOOK WITH LEADER
Leader: Stavros Christodoulides. Mobile: 99425050
Late winter visitors, early spring migrants and waterbirds.
Meet 09.00 am west end of Akhna Dam Wall.
Coordinates: 35° 03.25’ N, 33° 48.91’ E

**Saturday 17th February: Paphos Foothills**
Leader: Dave and Jan Walker. Mobile: 99915907
Winter thrushes and finches.
Meet at 9.00 am, roundabout Paphos end of motorway, lay-by at “Konia” exit.
Coordinates: 34° 47.09’ N, 32° 26.74’ E
March 2018

Saturday 3rd March: Evretou Area
Leader: Ray Atkinson. Mobile: 99011176
Early spring migrants and wetland birds.
Meet at 09.00 am Byrons Supermarket, Goudi (Paphos to Polis road at right turn to Steni)
Coordinates: 34° 59.01’ N, 32° 27.10’ E

Wednesday 7th March: Akrotiri Peninsula
Leader: June Neal. June Neal. Home Tel: 25932008, Mobile: 99918665
Late winter visitors, water birds and spring migrants.
Meet 8.30 am, (Please note the earlier start time) Viewing hide at Zakaki Marsh.
Coordinates: 34° 38.57’ N, 33° 00.23’ E

Saturday 17th March: Paphos Lighthouse
Leader: Ian and Kate Bloomer. Mobile: 99265661
Early Spring migrants.
Meet 8.30 am (please note the earlier start time), Entrance of Archaeological area by the Paphos Harbour Car Park.
Coordinates: 34° 45.36’ N, 32° 24.51’ E

Saturday 24th March: Larnaca Sewage Works & Oroklini Marsh
PLEASE PRE BOOK WITH LEADER
Leader: Martin Hellicar. Mobile: 99907893.
Spring migrants and waterbirds.
Meet 9.00 am, Larnaca Sewage Works Hide.
Coordinates: 34° 51.61’ N, 33° 37.64’ E

Friday 30th March - Sunday 1st April: Karpasia Peninsula
Spring migrants and rare residents.
Leader: Melis Charalambides. Home Tel: 22632155, Mobile: 99653205
Meet 11.00 am west end of Akhna Dam Wall.
Coordinates: 35° 03.25’ N, 33° 48.91’ E
Please book in advance with Melis Charalambides. Note, there is a 50 euro deposit on each booking

April 2018

Friday 6th April - Monday 9th April (Cypriot Easter)

Saturday 14th April: Asprokremmos Dam and Mandria
Leader: Alan Crane. Mobile: 99276310
Spring migrants.
Meet at 9.00 am, Asprokremmos Dam car park.
Coordinates: 34° 43.666’ N, 32° 33.14’ E

Saturday 21st April: Cape Greko
PLEASE PRE BOOK WITH LEADER
Leader: Stavros Christodoulides: Mobile: 99425050
Spring Migrants, (please note earlier start time).
Meet 8.00 am, Kermia Beach Hotel turn-off.
Coordinates: 34° 58.54’ N, 34° 02.46’ E
May 2018

Saturday 5th May: Kannaviou Dam, Paphos Forest and Vretsia
Leaders Dave and Jan Walker, Tel: Mobile: 99915907
Resident raptors, recent migrants and water birds.
Meet 9.00 am, Stroumbi, Esso Petrol Station, opposite turn off to Polemi.
Coordinates: 34° 52.62’ N, 32° 28.947’ E

Saturday 12th May: Akrotiri Peninsula.
Leader: June Neal. Home Tel: 25932008, Mobile: 99918665
Late spring migrants and water birds.
Meet 8.30 am, (please note the earlier start time), Akrotiri Marsh (Phassouri Reed-beds).
Coordinates: 34° 37.964’ N, 32° 56.05’ E

Saturday 19th May: End of Season Get Together Lunch
12.30 pm at Kyrenia Restaurant, Avdimou. Coordinates: 34° 39.49’ N, 32° 46.015’ E
For booking please contact: Mrs Loria Phylakti, Tel: Mobile: 99413383, email: loriaph@gmail.com
It was unusually hot and dry for late October but that did not put off a good and knowledgeable crowd of around 14 participants from attending this year's Larnaca autumn Fieldtrip. By 8.40, twenty minutes before our programmed starting time, we started gathering inside the Larnaca Sewage Works Hide and started scanning the two pools.

The south pool was completely dry with just a handful of Crested Larks and White Wagtails, so we concentrated our efforts on the north pool. Good numbers of ducks, dominated both the open water and the banks and causeway. We counted seven species; Mallard, Northern Pintail, Common Teal, Garganey, Northern Shoveler, Ferruginous Duck and Common Pochard. Most were in female or eclipse male plumage but we did manage a few smart males in amongst the plainer-looking birds. A winter plumaged Black-necked Grebe was seen alongside the much commoner Little Grebes, giving us the opportunity to compare our two smallest Grebe species. Elsewhere, there was a scattering of a dozen or so Greater Flamingo, some Yellow-legged Gull, two or three Black-headed Gull, some Coot and a few waders including Little Stint, Dunlin, Common Redshank, Ruff and Spur-winged Lapwing. Small passerines flitted in front of the hide keeping us entertained; Spectacled and Sardinian Warblers, Common Stonechat, White Wagtail and the ubiquitous House Sparrows.

Quite unexpectedly and without noticing it come in, on the side of the causeway by the water, we noticed a moulting Golden Plover, still showing a dark belly and golden yellow upperparts. It appeared rather slight and the dark underparts extended to its vent area. The bill appeared long and thin with a bulbous pointed tip, the head small and the legs and neck long and slender all good features for the very rare Pacific Golden Plover. I ran down to grab my camera for some record shots but unfortunately the bird proved camera shy and took off before I could get any photographs.

Excited we had just seen a good rarity but also a little deflated we couldn't see it for a while longer, we continued scanning the pool for new birds. In the distance, Alan Crane noticed a marsh Tern which although probably a Whiskered, was a little too far for positive ID. A flock of six Great Cormorants, my first of the season, came in and landed briefly giving us great fly-by views on their way back to the sea. Even more spectacular was a flock of 60+ Greater Flamingo which had been hidden on the bank in front of the hide and out of view. They took off giving us stunning views of their colourful wings rightly earning their scientific name Phoenicopterus (Phoenix wings)! The marsh tern came a lot closer and was joined by a second. We were delighted that the two birds were two different species, Whiskered Tern and White-winged Tern, giving us the opportunity to observe them flying together, noting their differences.

Scanning the nearby field we had a small group of Spur-winged Lapwing, a Golden Plover sp, Collared Pratincole and a Northern Wheatear. We tried to approach the Golden Plover for a better view but it flew off un-noticed, our consolation was seeing a Plain Tiger, a rare African migrant butterfly, drifting across the field.

At that point we decided to move on from the Sewage Works and try the Meneou coast in front of the Sewage Works where the Bar-tailed Godwit had been seen earlier that morning. Unfortunately, despite slowly driving up and down we couldn't relocate the bird so we moved on to the edge of the Larnaca Desalination Plant Fields. In the small bushes, we had mixed flocks of Spanish Sparrow and European Goldfinch. While scanning the fields we had a group of four European Golden Plover. On the Spiros Beach buoys we counted 9 European Shag, even at a distance noting their slim figure and thin bill compared to the Great Cormorants seen a little earlier.
Our last stop was the corner between Meneou Pools and Larnaca Airport Pools South and a chance to see the Eurasian Thick-knee (Stone-curlew) that frequently roost in the scrub at the edge of the salt lakes. After failing to locate the birds in their usual corner of the Airport Pools we managed to see them on the opposite side of the road at Meneou Pools while a colourful male Stonechat was the last bird of the day. Our autumn Larnaca Fieldtrip was once again a great success and we managed to observe a rare vagrant as well as many commoner species.

Field Meeting- Paphos Lighthouse - 28th October 2017

By Ian and Kate Bloomer

Twenty six participants, including Kate and myself, gathered at the CTO Beach Cafe car park on what promised to be a showery morning although sunny at the time. In addition to our “regulars” were a few visiting birders, including a couple from Austria, a keen birder from Germany and a couple from Vietnam.

As we started our walk along the headland, a juvenile European Shag was flying east along the coastline.

A couple of White Wagtail were busily feeding amongst the washed up seaweed, together with a Common Sandpiper. At this point a cry went up “Kingfisher” and we all turned to see a Common Kingfisher flying low towards the beach cafe. A large group of Sparrows, both House and Spanish were noisily feeding in the low vegetation when a Common Quail was spotted coming off the sea and flying into the Lighthouse grounds. Several Crested Larks, European Goldfinch, Common Stonechat and a single Red-throated Pipit were feeding in the vicinity as a Common Kestrel hovered overhead. Proceeding further along the headland towards the point, the sky became very black and the rain began to fall but we continued and were rewarded by three Ruddy Turnstone, feeding amongst the sea-weed and further along, two Greater Sand Plovers, maintaining a low profile in the driving wind and rain, which fortunately didn’t last very long. We then headed back to the car park, observing on the way, four Yellow-Legged Gull together with a single Black-Headed Gull.

We then entered Paphos Archaeological Park for the second leg of the trip and almost immediately nine Great Cormorant were spotted overhead, flying east. Walking down the avenue of trees by the Frankish Fort a Lesser Whitethroat was seen as well as many Great Tit busily feeding in the trees. As we turned the corner of the fort a female Common Redstart was spotted and a little later, a female Western Black Redstart was seen. Eurasian Blackcap were heard singing and a couple were then located. At this point a European Robin was heard “trilling” but not located. A juvenile Red-backed Shrike was spotted nearby, one of three seen on the day. A Willow Warbler was seen feeding around a fig tree as a pair of Eurasian Collared Dove perched above. Around the orchard, near the old workshop a late Whinchat was spotted together with a further two Lesser Whitethroat. On the ground in front of the Odeon a late-ish female Northern Wheatear was feeding and a Zitting Cisticola was perched nearby.

On the bushes behind the Odeon, a group of European Greenfinch were spotted and as we watched them, our attention was drawn by Alan to a nearby Spotted Flycatcher.

At this point, with the sky looking very black and the wind picking up, it was decided that this was a good point to end the field trip that seemed to have been enjoyed by all, with thirty-one species more than Kate and I had expected.
Twenty three people assembled at Zakaki hide on a beautiful, clear and sunny morning. Small birds in the area included **Bluethroat** perched on a reed stem then seen feeding around the pool edge vegetation; two feeding **Eurasian Reed Warbler**, one **Greater Reed Warbler**, several **Common Chiffchaff** and two **Cetti’s Warbler** stayed in view for a prolonged photo call, then one of the calling **Penduline Tits** appeared briefly. Two **Common Kingfisher** repeatedly flew through the reed bed stopping now and again to feed. At least six **Common Stonechat** were in the area (and noted every-where) and a female **Western Black Redstart** appeared briefly on the wall of the container park opposite.

In flight: **Great White Egret**, **Crested Lark**, **Eurasian Skylark**, **Common Kestrel**, **European Serin**, **Eurasian Sparrowhawk**, **Common Greenfinch**, **Common Chaffinch**, **Common Linnet**, many **Hooded Crow**, two **White Wagtail**, a solitary **Common Starling** and a **Little Egret** which came down to the reed-bed then a second was seen in flight later over from the opposite side of the reed-bed.

Amongst the reeds **Western Water Rail** and **Common Moorhen** were heard but not seen before we moved off to Lady’s Mile. There amongst the almost 700 **Black-headed Gull** were small numbers of **Mediterranean**, **Armenian**, **Yellow-legged Gulls** plus a single juvenile **Common Gull** in flight. Victor spotted a **Spur-winged Lapwing** in a clump of vegetation in the distance towards the port.

**Bishop’s Pool** provided a coffee break (early lunch) venue and views of duck on the pool which has been replenished by recent rains. The water still looks green but better than on our visit last month. **Ferruginous Duck**, **Common Teal**, **Northern Shoveler**, many **Little Grebe**, a few **Mallard** and **Common Coot** plus a **Common Moorhen** were present. Several **European Robin** heard singing and two seen plus **Great Tit**, at least eight **Common Chiffchaff**, then seven disturbed **Chukar** flew across the pathway.

In flight: **Common Chaffinch**, **Hooded Crow**, a **Long-legged Buzzard** and a **Common Buzzard** with a missing primary feather in its right wing then as we prepared to leave a female **Red-footed Falcon** flew in from the north and proceeded to hunt around the area – quite a surprise and a late bird passing through on migration.

Several hundred **Greater Flamingo** were on the Salt Lake but little else. Akrotiri Marsh (Phasouri Reed-beds) tower hide provided good views over the reed-beds and around it were more European Serin, **Great Tit**, **Chiffchaff** and a feeding Bluethroat. Raptors flying around the area, two **Eurasian Sparrowhawk**, one (possibly two) **Merlin** and **Eurasian Hobby**, at least four **Marsh Harrier** and **Common Kestrel**, and the same Long-legged Buzzard as at Bishop’s Pool plus a minimum of six **Common Buzzard** in the air at one time – but probably were in double figures. Smaller species included at least three **Zitting Cisticola**, singing **Eurasian Blackcap**, **Meadow Pipit**, calling **Red-throated Pipit** and Robins, two **Yellow Wagtail** and a Western Black Redstart.

At the old rabbit shed a hunter returned to his vehicle and talked to us about hunting and the quotas set. He was saddened and disappointed that another hunter was exceeding his quota but explained the difficulty in reporting this without there being consequences to his personal safety. He showed us a female Black Francolin which was permitted game and the pellet cartridge which he explained hunters should pick up rather than leave. We all felt sad for the loss of the Francolin but acknowledged his ‘respect for the sport’ and we parted amicably.

Those returning to Zakaki hide were lucky to see many Penduline Tit as well as the **Moustached Warbler** – a more fitting end to a good field meeting. My thanks to everyone taking part and for their keen observations and excellent company.
Last month's quiz photograph has two bird species. The first species should be quite straightforward to identify; grey body, black head, tail and wings identify the four surrounding birds are **Hooded Crows**, one of our commonest and most familiar species.

The second species is a bit tougher to identify. The presence of the Hooded Crows however should help, especially in determining the size and shape of the mystery bird. The bird is clearly a bird of prey with long, broad wings, small head and powerful legs. Its body length appears about 30% longer that the nearby crows with a considerably longer wingspan (around twice as long). On size alone, many bird of prey species are strong candidates, but size together with shape and plumage colouration should eliminate most species.

Our bird has very broad straight wings, a bull neck and a rather short, square tail. This eliminates similar sized birds of prey; Long-legged Buzzard, Honey Buzzard have longer, rounder tail, less broad wings; Black Kite has slimmer wings and forked tail; Osprey and Goshawk show different colouration and different shaped wings etc. In fact, on shape, the bird is quite clearly an Eagle sp. The larger very rare species like Golden, Imperial and Steppe Eagles can be eliminated as these are huge birds, twice the length of crows and almost four times the wingspan! Bonelli’s and Short-toed Eagles can also be eliminated as these shows bulging secondaries and different colours in
all plumages. We are left with the two Spotted Eagles. Greater Spotted and Lesser Spotted. These can be extremely difficult to identify and hybrids between the two are not uncommon. Greater Spotted is a rare vagrant on the island while the far commoner Lesser Spotted shows a white double crescent to carpal area, paler body and underwing contrasting with darker flight feathers, a shorter 7th finger and more rounded wingtips, while the yellow streaking on the breast is characteristic of some juveniles identifying our mystery bird as a juvenile Lesser Spotted Eagle.

The BirdLife Cyprus waterbirds monitoring programme has been running since 2005 and covers around 60 wetlands and other waterbird sites around the island. All sites are covered at least every January (mid-winter count) and every May (breeding season count), while the more important sites are also covered in March, September and November. Key Important Bird Area (IBA) wetlands such as the island’s two salt lakes, which attract large numbers of birds, are covered on a monthly basis. The monitoring programme is based on the voluntary work of a team of dedicated and experienced recorders and preliminary results are presented in the Monthly Checklist.

For October, 8 recorders covered 31 wetlands (including one coastal site) across the island where 5484 birds, of 57 different species were recorded.

The most abundant species was the Coot, with over 1100 individuals, with the second most abundant species being the Teal with 865 individuals closely followed by the Mallard with just under 800 individuals.

The wetland holding the most birds was Kanli Dam with 1185 individuals. Larnaka Sewage works was second in recorded individuals with 1091, while also being the second most species abundant site with 23 different species observed. Mia Milia Sewage Works had the highest species count with 27 different species while also being third in individuals recorded.

Seven sites (Akrotiri Marsh, Akrotiri Meras, Silverbeach Marsh, Klapsides Pool, Trachoni Pool, Sygkrasis Dam and Mavrokolybos Dam) had no individuals recorded.
## Site coverage for the October 2017 Waterbird Count
