*Cover photo: The Yellow-browed Warbler *Phylloscopus inornatus* breeds in temperate Asia. It is increasingly becoming more frequently observed during autumn migration in western Europe and although in Cyprus we still do not see the numbers seen for example on the east coast of the UK, we have recently been seeing one or two records a year. So far the only record for 2018 was found on 25th October at Agia Varvara (Paphos) by Dave and Jan Walker. Dave took this photo the next day when the bird was still present and seen well by several other local birders. This is the 20th record for Cyprus.*

COMPILATION OF MONTHLY CHECKLIST

The Monthly Checklist and Society News is compiled by Dave and Jan Walker.

We would love to hear from members and friends who would like to provide bird and bird watching related articles in future editions of the Monthly Checklist. Get in touch and let us know your ideas. Suggestions for topics could include ID pointers, great locations to visit, birding walks or drives or interesting personal birding experiences that you feel fellow readers would enjoy. Please contact Dave Walker 99915907 davidwalker@cytanet.com.cy

If you are sending photographs for inclusion in the Systematic List please send them by 18th of the month to Jane Stylianou. Every effort is made to ensure that the work of as many contributors as possible is used but inclusion cannot be guaranteed. Please send photographs in JPEG format where possible. Please send to janestycy@yahoo.co.uk. Telephone: 99558953

Birdline Operated by June Neal on behalf of BirdLife Cyprus is the bird information hotline. To hear a pre-recorded message with recent interesting bird sightings and to add your own observations, please phone 00357 25 934076.

Join the [BirdLife Cyprus Google](#) group to exchange and receive emails updating local and visiting birders about recent sightings <https://groups.google.com/forum/#forum/birdlifecyprusbirds>

KEEP UP TO DATE AND SHARE RECENT SIGHTINGS WITH THE BIRDLIFE CYPRUS GOOGLE GROUP

Continuing BirdLife Cyprus' attempts to ensure both resident and visiting birders receive up to date information on the birds being spotted on the island, we have set up a Google Group through which group members can email in their recent sightings and bird news and receive and read those of other members.

If you would like to join please [click here](#).

Email: BirdLifeCyprusBirds@googlegroups.com

Once you are a member you can choose whether to receive all emails or check the news via the web at a time convenient to you. Visit the settings option to ensure that you get emails if you want to. It is an informal group for birders to share what is around. It cannot be checked for accuracy or be held responsible for misinformation. The group is open to both BirdLife Cyprus members and non-members alike. If you know a non-member or friend who may be interested please let them know.

Any news will also be shared with the BirdLife Cyprus BirdLine 25 934076 and the BirdLife Cyprus [Recent sightings page](#) of the website. You can also use these two resources to find out what is around if you don't want to join the Google group.

YOUR BIRDING SIGHTINGS ARE IMPORTANT. PLEASE DON'T FORGET TO SEND THEM TO THE RECORDER

Jane Stylianou

Whether you go out bird watching regularly or just enjoy noting what you see when out on a walk, any record of what you see is important to help us keep an up to date database of the birds of Cyprus.

Most people submit their records on a monthly basis. To be included in the Systematic List that appears in the Monthly Checklist please make sure that Jane receives your records by the 10th of the following month or are added to BirdTrack by that date. But don't worry if you miss the deadline, your sightings will still be added to the database and be used in compiling the annual Cyprus Bird Report. On occasions, you may be asked to provide extra details of rarer birds or of those seen out of season or away from their usual locations. This is something that happens to all observers and is not a reflection on anyone's bird watching skills! A list of the species for which a Rare Bird Report is required can be obtained from Jane.

There are several ways to make sure that your records count by submitting them to the BirdLife Cyprus Recorder, Jane Stylianou who will add them to the country database:

Use the Cyprus portal of BirdTrack <http://blc.birdtrack.net> or download our [reporting excel](#). The recorder is happy to receive your sightings by email but where possible please try to use either BirdTrack or the Excel form. Please contact her if you have any questions janesytcy@yahoo.co.uk mobile telephone 99558953.

Οι καταγραφές σας είναι σημαντικές για μας για να μπορέσουμε να κρατήσουμε τη βάση δεδομένων για τα πουλιά της Κύπρου ενημερωμένη. Για να συμπεριληφθούν οι καταγραφές σας στον Μηνιαίο Συστηματικό Κατάλογο παρακαλούμε συμπληρώστε [το έντυπο αυτό](#) και στείλτε το στην Jane την Υπεύθυνη Καταγραφών, μέχρι τις 10 του επόμενου μήνα ή ανεβάστε τις καταγραφές σας στο [BirdTrack](#) μέχρι εκείνη την ημερομηνία. Μην ανησυχείτε όμως εάν χάσετε την προθεσμία. Οι καταγραφές σας θα προστεθούν στη βάση δεδομένων και θα χρησιμοποιηθούν στην Ετήσια Ορνιθολογική Αναφορά.

Για οποιαδήποτε διευκρίνιση επικοινωνήστε με την Jane στο janesytcy@yahoo.co.uk ή στο 99558953.

SCHEDULE OF BIRDLIFE CYPRUS FIELD MEETINGS AND ACTIVITIES

The Winter/Spring schedule 2018/19

*For field trips, please don't forget your flask of coffee and sandwiches. Although their higher clearance is an advantage, 4x4s are not necessary for any of the field trips unless **stated otherwise** below. The schedule of field trips is drawn up well in advance of the actual dates. The schedule will only change due to an extraordinary event. However, it is sometimes necessary to assign a different leader. **Please note certain field trips require pre booking with the leader to ensure there are suitable conditions at the site for the time of year and sufficient participation (These will be marked Pre Book). Participants in field trips are always advised therefore to check with the BirdLife Cyprus website in case of any late changes or cancellations.** Whilst BirdLife Cyprus does not charge for attending field trips, any voluntary donation to its conservation work would be very welcome. Please present your gift to the leader on the day.*

*To assist new members and visiting birders, who have access to a GPS or Google Earth, to locate our 'meeting points more easily', **we have introduced coordinates into the following schedule.** Simply copy and paste the coordinates into the "Search bar" in "Google Earth" and click on it. For most instruments it is unnecessary to type in the degree and minute symbols (° & ') or the N and E letters.*

Important Announcement: Participation in BirdLife Cyprus field meetings is at one's own risk. BirdLife Cyprus accepts no liability or responsibility for accidents, illness, injury or loss or damage to property that might occur. Field trips require light to moderate exercise. Please contact the field trip leader for more information on difficulty, distances and terrain of a particular field trip.

Σημαντική Ανακοίνωση: Η συμμετοχή σας στις εξορμήσεις του Πτηνολογικού Συνδέσμου γίνεται με δική σας ευθύνη. Ο Πτηνολογικός Σύνδεσμος Κύπρου δεν φέρει καμία ευθύνη για τυχόν ατυχήματα, ασθένειες, απώλειες ή ζημιές σε προσωπικά αντικείμενα. Οι εξορμήσεις απαιτούν ελαφριά με μέτρια άσκηση. December 2018

Saturday 1st December: Kidasi

Leader: Dave Walker, Mobile: 99915907

Griffon Vultures and winter visitors.

Meet at 9.00 am, Asprokremnos Dam car park.

Google Maps link: <https://goo.gl/maps/F23CnS5iZA42>

Saturday 8th December: Larnaca Sewage Works

PLEASE PRE BOOK WITH LEADER

Leader: Martin Hellicar. Mobile: 99907893

Wintering gulls and waterfowl.

Meet at 9.00 am, Larnaca Sewage Pool hide.

Google Maps link: <https://goo.gl/maps/TZ1v4RHqSxQ2>

January 2019

Saturday 12th January: Akrotiri Peninsula

Leader: Victor Tjernberg. Mobile: 96107299.

Wintering gulls, waterfowl and passerines.

Meet at 9.00 am, car park adjacent to the hide at Zakaki ponds off the road to Lady's Mile.

Google Maps link: <https://goo.gl/maps/nY2GENJHjfx>

Saturday 19th January: Larnaca Sewage Works

PLEASE PRE BOOK WITH LEADER

Leader: Martin Hellicar. Mobile: 99907893

Wintering gulls and waterfowl.

Meet at 9.00 am, Larnaca Sewage Pool hide.

Google Maps link: <https://goo.gl/maps/xW5dk5txAN62>

Saturday 19th January: New Year get-together

Join us for lunch after the field trip. Venue to be decided at Mackenzie Beach

Further details will follow.

Please contact Loria Phylaki for booking, Mobile: 99413383

email: loriaph@gmail.com

Saturday 26th January: Akrotiri Peninsula

Leader: Victor Tjernberg. Mobile: 96107299

Waterbirds and other winter visitors.

Meet at 9.00 am, Akrotiri Marsh (Phassouri Reed beds).

Google Maps link: <https://goo.gl/maps/oaCQat3x7tH2>

February 2019

Saturday 9th February: Akhna Dam & Oroklini Marsh

PLEASE PRE BOOK WITH LEADER

Leader: Stavros Christodoulides. Mobile: 99425050

Late winter visitors, early spring migrants and waterbirds.

Meet 09.00 am west end of Akhna Dam Wall.

Google Maps link: <https://goo.gl/maps/cYJi754DpHR2>

Saturday 16th February: Paphos Foothills

Leader: Dave and Jan Walker. Mobile: 99915907

Winter thrushes and finches.

Meet at 9.00 am, roundabout Paphos end of motorway, lay-by at "Konia" exit.

Google Maps Link: <https://goo.gl/maps/qpJECsvpMHs>

March 2018

Wednesday 6th March: Akrotiri Peninsula

Leader: Victor Tjernberg. Mobile: 96107299

Late winter visitors, water birds and spring migrants.

Meet 8.30 am, (Please note the earlier start time) Viewing hide at Zakaki Marsh.

Google Maps link: <https://goo.gl/maps/nY2GENJHjfx>

Saturday 16th March: Paphos Lighthouse

Leader: Ian and Kate Bloomer. Mobile: 99265661

Early Spring migrants.

Meet 8.30 am (please note the earlier start time), Entrance of Archaeological area by the Paphos Harbour Car Park.

<https://goo.gl/maps/K7eKYqWh7LD2>

Saturday 23th March: Larnaca Sewage Works & Oroklini Marsh
PLEASE PRE BOOK WITH LEADER

Leader: Martin Hellicar. Mobile: 99907893.

Spring migrants and waterbirds.

Meet at 9.00 am, Larnaca Sewage Pool hide.

Google Maps link: <https://goo.gl/maps/xW5dk5txAN62>

April 2019

Friday 5th April - Sunday 7th April: Karpasia Peninsula

Spring migrants and rare residents.

Leader: Melis Charalambides. Home Tel: 22632155, Mobile: 99653205

Meet 11.00 am west end of Akhna Dam Wall.

Google Maps link: <https://goo.gl/maps/cYJi754DpHR2>

Please book in advance with Melis Charalambides.

Saturday 13th April: Asprokremmos Dam and Mandria

Leader: Alan Crane. Mobile: 99276310

Spring migrants.

Meet at 9.00 am, Asprokremmos Dam car park.

Google Maps link: <https://goo.gl/maps/F23CnS5iZA42>

Saturday 20th April: Cape Greko

PLEASE PRE BOOK WITH LEADER

Leader: Stavros Christodoulides: Mobile: 99425050

Spring Migrants, (please note new meeting point.

Meet 8.00 am, Capri Grko Environmental Centre

Google Maps Link: <https://goo.gl/maps/zPRPnzJoxTB2>

Friday 26th April - Monday 29th April (Cypriot Easter)

Saturday 27th April: Arodes and Androlikou Akamas Villages

Leader: Dave and Jan Walker: Mobile: 99915907

Meet 9.00 am Pano Arodes square, St. Kelandion Church

Google Maps Link: <https://goo.gl/maps/emfrqyYToan>

May 2019

Saturday 4th May: Akrotiri Peninsula.

Leader: Victor Tjernberg. Mobile: 96107299

Late spring migrants and water birds.

Meet 8.30 am, Akrotiri Marsh (Phassouri Reed beds).

Google Maps link: <https://goo.gl/maps/oaCQat3x7tH2>

Saturday 18th May: End of Season Get Together Lunch

12.30 pm at Kyrenia Restaurant, Avdimou.

Google Maps Link: <https://goo.gl/maps/CcfiYnirUoH2>

For booking please contact: Mrs Loria Phylakti, Tel: Mobile: 99413383, email: loriaph@gmail.com

FIELD MEETING - PAPHOS HEADLAND & LIGHTHOUSE - 27th October 2018

By Kate Bloomer

It was a bright and clear sunny morning when Ian and I met up with sixteen other birders at the CTO car park on the headland in Paphos. Amongst the regular birders were three visitors, Virginia visiting from South Africa and her son in law Tony, now residing locally and Alexander Foki, a Birdlife Austria member who had joined us the previous year on his visit to Cyprus.

As we started along the headland we saw **Kestrel** in the distance and heard **Corn Bunting** calling. Three **Yellow-Legged Gulls** flew past us out to sea and **Hooded Crows** were feeding on the shoreline.

White Wagtails and **Crested Lark** were feeding and calling along the pathway and a flock of **Linnetts** flew overhead. **Spanish** and **House Sparrow** were in abundance amongst the bushes. We searched the shoreline for waders and were rewarded with good views of a lone **Common Sandpiper**. A **Zitting Cisticola** flew overhead, calling and many **Stonechat** were seen on top of the thistles and bushes.

Sardinian Warblers were seen darting for cover and hiding deep down in the bushes and **Goldfinch** were in abundance, feeding on the seed heads.

As the over-wintering **Greater Sand Plover** were not in their usual position along the shoreline, we proceeded and were then delighted to see the four sitting together further up at the point.

As we journeyed back along the headland we saw a **Kingfisher** fishing from a boulder, making frequent forays into a pool, much to the delight of everyone, especially Sue who had hoped to see this bird on our walk and we were able to watch it for several minutes before it flew off to another perch.

As we scanned the shoreline, a **Ruddy Turnstone** was seen feeding amongst the seaweed and just as we were nearing the end of our walk, the over wintering **Whimbrel** was spotted sitting high up on a rock, with the sea as a backdrop, a great end to this part of our meeting.

We had a short break for refreshments in the car park before driving along to the Archaeological site in Paphos harbour for the second part of our meeting.

As we walked down the avenue of trees in front of the Frankish Fort we observed **Great Tit**, **Chiff Chaff** and **Willow Warbler** feeding amongst the trees.

Turning the corner we heard **Blackcap** singing and observed many of them flitting between a large bush and a tree. **Serín** was also spotted and watched with delight.

Jan heard the tick tick tick of a **Robin** and we eventually spotted it skulking low in a bush. As we walked toward the Odeon **Chaffinch** and **Great Tit** were seen flitting between the ground and the trees and many **Sardinian Warblers** flitting about.

As the site was particularly quiet bird wise we decided to end the meeting at this point and we parted company after a thoroughly enjoyable morning with 25 species seen.

FIELD MEETING - AKROTIRI PENINSULA - 7th November 2018

by Victor Tjernberg

Our day started at Zakaki Hide where the reeds had recently been cleared which thus created a whole view for bird watching, both from the hide and the areas surrounding it. Soon we became 17 eager birders who started scanning the area. No less than four **Moustached Warblers** greeted us with very nice views whilst searching for insects in the water's edge around the hide. **Spotted Crake** and **Citrine Wagtail** were also enjoyed from just a few meters away. A bit further away in the pool a female **Pintail**, a **Little Grebe** and plenty of **Moorhen** was visible throughout the morning. Plenty of **Black-headed Gulls** continuously swooped down to the pool as well for a few seconds of feeding frenzy before taking off again, never settling. A few **Penduline Tits** could be heard several times but only showed themselves a few times very quickly. Similarly so did a couple of **Reed Buntings** during the early morning.

After an hour we moved on to the beginning of Lady's Mile to sort through the several hundreds of gulls resting in the pools along the road. About 1.400 Black-headed Gulls but sadly only a few **Caspian Gulls** and **Armenian Gulls** could be seen. No other gems were hiding in the big flock this time. Driving down towards Bishop's Pool we scanned the rest of Lady's Mile without seeing a single wader, which was surprising and very disappointing.

At Bishop's Pool we could see more or less the usual suspects along with plenty of Little Grebe, one single **Black-necked Grebe** and quite a few **Northern Shovelers**. Another surprise was that we could not find any Ferruginous Ducks this time.

After a sandwich and a cup of coffee we had topped up our energy to move on down to the tower hide at Akrotiri Marsh. Here we enjoyed fantastic views of a few birds that came very close! First to be seen was a **Little Bittern** who at two occasions gave us plenty of time to study it in detail. Afterwards was a Penduline Tit that popped out of nowhere and displayed nicely close to the tower. And of course the compulsory **Kingfisher** came and showed off with its fishing skills – never a disappointment.

After this we were quite satisfied with our day of birding. All in all we had a total count of 59 species! A big thanks to everyone who participated!

Corncrake in Frenaros area

By Christoph Hein

Birdlife Cyprus and Birdlife Germany (Naturschutzbund Deutschland NABU) started in 2017 to develop two plots of land in the Frenaros / Avgorou area. Main topic is to offer a safe place for birds to stop during migration, protected first of all from hunting and illegal trapping. Actually half of the place is covered by trees (pine trees, fruit trees, Carob, Olive) and bushes (Lentiscus), the second half is non-cultivated farmland. The „wooded“ part is fenced, the other part should be fenced in the near future to give a more natural development (plantation of bushes is in the program) a better chance against browsing goats.

A first baseline study has been made in autumn 2018 to observe the arrival and movements of birds on the plots and to understand the necessary improvements to make the place still more attractive for birds in migration. A wildlifecamera, set up on the plot to verify the presence of different mammals like fox or hedgehog, made a very interesting observation possible: a corncrake (*Crex crex*) resting on the plot.

The bird was first registered on the 12.10.2018 and photos of the bird have been taken automatically again in the following days (15.10. / 17.10. / 19.10. / 20.10.2018). Searching the bird on the plot had no success. Unfortunately the pictures show clearly a damage of the left wing of the bird - most probably the bird isn't able to continue its migration. Or it remains still in the area or became an easy prey to a predator like dog, fox or kestrel.

The Cyprus Bird Reports of the last years defines the corncrake "A very scarce passage migrant.", just single or few records have been made every year. Most probably the species is often overseen in migration.

The corncrake normally doesn't overwinter in the Mediterranean, but continues to migrate to the main wintering sites in the south-east of Africa. No findings of ringed corncrakes are reported from Cyprus.

BIRD PHOTO QUIZ

Stavros Christodoulides

PHOTO # 66

Last Month's Quiz answer

October's mystery bird is a rather colourful thick-billed passerine with pale trimmed dark tail and wing feathers, a scaly reddish-brown rump, brown-streaked greenish-yellow upperparts, a streaked crown and a bright yellow throat.

The small triangular, bicoloured bill, characteristic head pattern (prominent eye and moustachial stripes) and overall colouration suggest that our mystery bird is a species of Bunting, a widespread old world genus of birds belonging to the family Emberizidae. 13 species have been recorded in Cyprus, one occurring as a breeding resident, two as breeding summer visitors and the rest as migrants, winter visitors or rare vagrants. The resident Corn Bunting, our largest and most widespread species, can be ruled out as this is an entirely greyish-brown and white bird. Cretzschmar's and Ortolan Buntings, the first a breeding summer visitor the other a passage migrant, can also be ruled out as they show different colours and pattern. Reed Bunting, our commonest winter visitor is also brown, black and white and can be ruled out as can the vagrant Little, Rock, Rustic and Striolated Buntings that all show no yellow. We are left with three superficially similar species, all showing varying amount of yellow. One is a migrant breeder, the other a rare passage migrant while the third is a scarce winter visitor. The face pattern immediately rules out Black-headed Bunting, which shows a plain face/head in all plumages. We are left with two quite different and easy to identify species. Cinereous Bunting is a scarce passage migrant, mostly in spring, which shows a greyish back and rump and no eyestripe and can be ruled out. Our bird is a **Yellowhammer**, a scarce winter visitor mostly at higher elevations.

A – Z of Cyprus Bird Watching – Almirolivado – Troodos

By June Neal

If you wish to learn more about a topic highlight the link to a web page (underlined blue text) and copy it into your web browser.

A good site to see winter visitors as well as resident birds in Troodos with its mixture of trees, bushes and peat meadow attracting several interesting species, eg

Mistle Thrush, Τριζάρα, *Turdus iscivorus*

Song Thrush, Τζιηκλα, *Turdus hilomelos*

Brambling, Χειμωνόσπινος, *Fringilla montifringilla*

Hawfinch, Τζιεφαλόςπινος, *Coccothraustes coccothraustes*

Goldcrest, Χρυσοβασιλίσκος, *Regulus regulus*

Resident birds include Coal Tit, Πέμπτεσος, *Periparus ater* *Cypriotes*; Short-toed Tree-creeper, Δενδροβάτης, *Certhia brachydactyla dorotheae* and Eurasian Jays, Κίσσα, *Garrulus glandarius glazneri*, Eurasian Blackbird, ♂ Μαυρόπουλλος (♀ Μαυρότζικλα), *Turdus merula* .

Other breeding species include summer visitors – Masked Shrike, Δακκαννούρα, *Lanius nubicus* with 12 adults and nine fledglings seen here 3 July 2010

Spotted Flycatcher, Μουγιοφάς, *Muscicapa striata*

Rarities which have been seen here include -

Yellowhammer, Χρυσοπιτίλλα, *Emberiza citronella* on 21 November 2014

Pine Bunting, Πευκοπιτίλλα, *Emberiza leucocephalos* – two males in November 2014

MONTHLY WATERBIRD COUNT

October 2018

Markos Charalambides

The BirdLife Cyprus waterbirds monitoring programme has been running since 2005 and covers around 70 wetlands and other waterbird sites around the island. All sites are covered at least every January (mid-winter count) and every May (breeding season count), while the more important sites are also covered in March, September and November. Key Important Bird Area (IBA) wetlands such as the island's two salt lakes, which attract large numbers of birds, are covered on a monthly basis. The monitoring programme is based on the voluntary work of a team of dedicated and experienced recorders and preliminary results are presented in the Monthly Checklist.

For September, 12 recorders covered 34 wetlands (including one coastal sites) across the island where 6391 birds, of 54 different species were recorded.

The most abundant species was the Shoveler with 1038 individuals. The second most abundant species was the Mallard with 558 individuals followed by the Coot with 822 individuals.

The wetland holding the most birds as well as being first in terms of species abundance, was Mia Milia Sewage Works with 3143 individuals from 23 different species. Larnaka Sewage Works was second in recorded individuals as well as species abundance with 940 individuals from 19 different species.

Mavrokolymbos Dam and Akrotiri Marsh only had 1 individual recorded at the whole site.

Akrotiri Meras had no waterbirds present. Kanli Dam, Kouklia Dam, Gypsou Dam, Sygkrasis Dam, Partiki Marsh, and Galatea Marsh were dry and thus no waterbirds were recorded.

Site coverage for the October 2018 Waterbird Count
