Cover photo: The small Zitting Cisticola *Cisticola juncidis* is a common breeding resident in Cyprus and can be seen flying over cereal and other fields making its distinctive call throughout the spring. This photograph was taken by Rajia Howard and gives a good opportunity to see its plumage features in detail which are not so apparent when it is seen in flight.

COMPILATION OF MONTHLY CHECKLIST

The Monthly Checklist and Society News is compiled by Dave and Jan Walker.

We would love to hear from members and friends who would like to provide bird and bird watching related articles in future editions of the Monthly Checklist. Get in touch and let us know your ideas. Suggestions for topics could include ID pointers, great locations to visit, birding walks or drives or interesting personal birding experiences that you feel fellow readers would enjoy. Please contact Dave Walker 99915907 davidwalker@cytanet.com.cy

If you are sending photographs for inclusion in the Systematic List please send them by 18th of the month to Jane Stylianou. Every effort is made to ensure that the work of as many contributors as possible is used but inclusion cannot be guaranteed. Please send photographs in JPEG format where possible. Please send to janesty@cytanet.com.cy. Telephone: 99558953

Birdline Operated by June Neal on behalf of BirdLife Cyprus is the bird information hotline. To hear a pre-recorded message with recent interesting bird sightings and to add your own observations, please phone 00357 25 934076.

Join the [BirdLife Cyprus Google](#) group to exchange and receive emails updating local and visiting birders about recent sightings <https://groups.google.com/forum/#!forum/birdlifecyprusbirds>

KEEP UP TO DATE AND SHARE RECENT SIGHTINGS WITH THE BIRDLIFE CYPRUS GOOGLE GROUP

Continuing BirdLife Cyprus' attempts to ensure both resident and visiting birders receive up to date information on the birds being spotted on the island, we have set up a Google Group through which group members can email in their recent sightings and bird news and receive and read those of other members.

If you would like to join please [click here](#).

Email: BirdLifeCyprusBirds@googlegroups.com

Once you are a member you can choose whether to receive all emails or check the news via the web at a time convenient to you. Visit the settings option to ensure that you get emails if you want to. It is an informal group for birders to share what is around. It cannot be checked for accuracy or be held responsible for misinformation. The group is open to both BirdLife Cyprus members and non-members alike. If you know a non-member or friend who may be interested please let them know.

Any news will also be shared with the BirdLife Cyprus BirdLine 25 934076 and the BirdLife Cyprus [Recent sightings page](#) of the website. You can also use these two resources to find out what is around if you don't want to join the Google group.

YOUR BIRDING SIGHTINGS ARE IMPORTANT. PLEASE DON'T FORGET TO SEND THEM TO THE RECORDER

Jane Stylianou

Whether you go out bird watching regularly or just enjoy noting what you see when out on a walk, any record of what you see is important to help us keep an up to date database of the birds of Cyprus.

Most people submit their records on a monthly basis. To be included in the Systematic List that appears in the Monthly Checklist please make sure that Jane receives your records by the 10th of the following month or are added to BirdTrack by that date. But don't worry if you miss the deadline, your sightings will still be added to the database and be used in compiling the annual Cyprus Bird Report. On occasions, you may be asked to provide extra details of rarer birds or of those seen out of season or away from their usual locations. This is something that happens to all observers and is not a reflection on anyone's bird watching skills! A list of the species for which a Rare Bird Report is required can be obtained from Jane.

There are several ways to make sure that your records count by submitting them to the BirdLife Cyprus Recorder, Jane Stylianou who will add them to the country database:

Use the Cyprus portal of BirdTrack <http://blc.birdtrack.net> or download our [reporting excel](#). The recorder is happy to receive your sightings by email but where possible please try to use either BirdTrack or the Excel form. Please contact her if you have any questions janesytcy@yahoo.co.uk mobile telephone 99558953.

Οι καταγραφές σας είναι σημαντικές για μας για να μπορέσουμε να κρατήσουμε τη βάση δεδομένων για τα πουλιά της Κύπρου ενημερωμένη. Για να συμπεριληφθούν οι καταγραφές σας στον Μηνιαίο Συστηματικό Κατάλογο παρακαλούμε συμπληρώστε [το έντυπο αυτό](#) και στείλτε το στην Jane την Υπεύθυνη Καταγραφών, μέχρι τις 10 του επόμενου μήνα ή ανεβάστε τις καταγραφές σας στο [BirdTrack](#) μέχρι εκείνη την ημερομηνία. Μην ανησυχείτε όμως εάν χάσετε την προθεσμία. Οι καταγραφές σας θα προστεθούν στη βάση δεδομένων και θα χρησιμοποιηθούν στην Ετήσια Ορνιθολογική Αναφορά.

CYPRUS BIRD REPORT 2016

Cyprus Bird Report 2016

The Cyprus Bird Report 2016 will soon be available. The report contains 53 colour photos, the 2016 Systematic List of 310 observed species or recognised forms which was compiled from nearly 61,000 records, the 2016 Ringing report. Plus papers on the first Brown-necked Raven, Amur Falcon, Rustic Bunting and Oriental Turtle Dove in Cyprus; the declining trend of Cyprus' Audouin's Gull colony; the BirdLife Cyprus 2016 monitoring programmes; the breeding biology of the European Roller in western Cyprus and patterns of incidence of Troodos song birds at a rainwater resource. The Report includes species charts and tables and a full Cyprus bird List. The front cover features a pair of Great Spotted Cuckoo photographed at Anarita Park. The Report will be sent automatically to those BirdLife Cyprus members whose membership includes it. Extra copies can be purchased if required by contacting the BirdLife Cyprus office.

SCHEDULE OF BIRDLIFE CYPRUS FIELD MEETINGS AND ACTIVITIES

The Autumn/Winter/Spring schedule 2017/2018

For field trips, please don't forget your flask of coffee and sandwiches

*Although their higher clearance is an advantage, 4x4s are not necessary for any of the field trips unless **stated otherwise** below.*

The schedule of field trips is drawn up well in advance of the actual dates. The schedule will only change due to an extraordinary event. However, it is sometimes necessary to assign a different leader.

Please note certain field trips require pre booking with the leader to ensure there are suitable conditions at the site for the time of year and sufficient participation (These will be marked Pre Book). Participants in field trips are always advised therefore to check with the BirdLife Cyprus website in case of any late changes or cancellations.

Whilst BirdLife Cyprus does not charge for attending field trips, any voluntary donation to its conservation work would be very welcome. Please present your gift to the leader on the day.

*To assist new members and visiting birders, who have access to a GPS or Google Earth, to locate our 'meeting points more easily', **we have introduced coordinates into the following schedule.** Simply copy and paste the coordinates into the "Search bar" in "Google Earth" and click on it. For most instruments it is unnecessary to type in the degree and minute symbols (° & ') or the N and E letters.*

Important Announcement: Participation in BirdLife Cyprus field meetings is at one's own risk. BirdLife Cyprus accepts no liability or responsibility for accidents, illness, injury or loss or damage to property that might occur. Field trips require light to moderate exercise. Please contact the field trip leader for more information on difficulty, distances and terrain of a particular field trip.

March 2018

Saturday 3rd March: Evretou Area
PLEASE NOTE THIS IS CANCELLED

Wednesday 7th March: Akrotiri Peninsula

Leader: June Neal. June Neal. Home Tel: 25932008, Mobile: 99918665

Late winter visitors, water birds and spring migrants.

Meet 8.30 am, (Please note the earlier start time) Viewing hide at Zakaki Marsh.

Coordinates: 34° 38.57' N, 33° 00.23' E

Saturday 17th March: Paphos Lighthouse

Leader: Ian and Kate Bloomer. Mobile: 99265661

Early Spring migrants.

Meet 8.30 am (please note the earlier start time),

Entrance of Archaeological area by the Paphos Harbour Car Park.

Coordinates: 34° 45.36' N, 32° 24.51' E

Saturday 24th March: Larnaca Sewage Works & Oroklini Marsh

PLEASE PRE BOOK WITH LEADER

Leader: Martin Hellicar. Mobile: 99907893.

Spring migrants and waterbirds.

Meet 9.00 am, Larnaca Sewage Works Hide.

Coordinates: 34° 51.61' N, 33° 37.64' E

Friday 30th March - Sunday 1st April: Karpasia Peninsula

Spring migrants and rare residents.

Leader: Melis Charalambides. Home Tel: 22632155, Mobile: 99653205

Meet 11.00 am west end of Akhna Dam Wall.

Coordinates: 35° 03.25' N, 33° 48.91' E

Please book in advance with Melis Charalambides. Note, there is a 50 euro deposit on each booking

April 2018

Friday 6th April - Monday 9th April (Cypriot Easter)

Saturday 14th April: Asprokremmos Dam and Mandria

Leader: Alan Crane. Mobile: 99276310

Spring migrants.

Meet at 9.00 am, Asprokremmos Dam car park.

Coordinates: 34° 43.666' N, 32° 33.14' E

Saturday 21st April: Cape Greko

PLEASE PRE BOOK WITH LEADER

Leader: Stavros Christodoulides: Mobile: 99425050

Spring Migrants, (please note earlier start time).

Meet 8.00 am, Kermia Beach Hotel turn-off.

Coordinates: 34° 58.54' N, 34° 02.46' E

May 2018

Saturday 5th May: Kannaviou Dam, Paphos Forest and Vretsia

Leaders Dave and Jan Walker, Tel: Mobile: 99915907

Resident raptors, recent migrants and water birds.

Meet 9.00 am, Stroumbi, Esso Petrol Station, opposite turn off to Polemi.

Coordinates: 34° 52.62' N, 32° 28.947' E

Saturday 12th May: Akrotiri Peninsula.

Leader: June Neal. Home Tel: 25932008, Mobile: 99918665

Late spring migrants and water birds.

Meet 8.30 am, (please note the earlier start time), Akrotiri Marsh (Phassouri Reed-beds).

Coordinates: 34° 37.964' N, 32° 56.05' E

Saturday 19th May: End of Season Get Together Lunch

12.30 pm at Kyrenia Restaurant, Avdimou. Coordinates: 34° 39.49' N, 32° 46.015' E

For booking please contact: Mrs Loria Phylakti, Tel: Mobile: 99413383, email: loriaph@gmail.com

AKROTIRI FIELD MEETING 27 JANUARY 2018

By June Neal

Sixteen people met at Akrotiri Marsh (formerly Phasouri Reed-beds) on a pleasantly warm and clear morning which was surprising after the bad weather during the week. At first glance the only birds around were a perched **Eurasian Buzzard** near the tower hide car park (later seen in flight) and a large flock of feral pigeon. Along the track, however, **Common Chaffinch** and **Greenfinch**, **Cetti's Warbler** and **Common Goldfinch** were seen and heard then a small flock of **European Serin** feeding in bushes near the agro farm building. At least three **Black Francolin** were calling loudly as we assembled then they went quiet then the **European Robin** and **Eurasian Blackcap** songs were heard.

On the water meadow two **Little Egret** were feeding, a pair of **Common Stonechat** and at least four **Zitting Cisticola** were busy flying about. A few people saw the solitary **Spur-winged Lapwing** in flight as it was chased by a Hooded Crow. Four **Common Coot** and two **Little Grebe** were feeding on the pool around the hide. From the viewpoint near the old rabbit farm two hunting female **Western Marsh Harrier** were seen and a possible ring-tail **Hen Harrier** flew low over the reeds then down out of sight. A probable **Yellow-legged Gull** overflew the Gravel Pits where a flock of 20+ Greenfinch were noted with more Stonechats. The track was full of huge puddles so we retraced our route seeing two **White Wagtail** and at least six **Meadow Pipit**. At least three more Buzzards were perched or in flight in the area.

Akrotiri Salt Lake was much larger than our visit earlier in the month following the recent heavy rains and around 4000 **Greater Flamingo** were seen with over 200 **Common Shelduck** around them. A flock of 40 gulls were too distant to identify but then a **Common Crane** was seen in among the Flamingos. A **Eurasian Sparrowhawk** overflew the Environmental Education Centre whilst we watched **Sardinian Warbler** and Stonechats. Bishop's Pool was locked so we sensibly decided to take the long route to Zakaki only to discover that the area around the hide was in use by a theatrical group so we confined our attention to the roadside reed-bed seeing a **Common Kingfisher** in flight, a couple of **Common Moorhen** and **Common Chiffchaff**.

Lady's Mile provided ample opportunity to study the gull flocks. Seven species of gull were identified – hundreds of **Black-headed** plus a few **Armenian**, **Yellow-legged** and **Caspian**, 1 adult **Mediterranean** with a darkening cap, an immature **Slender-billed Gull** on the sea and a few very quick glimpses of a lone **Little Gull** plus an obliging **Sandwich Tern** fishing over the sea. By then everyone was hungry and departed for lunch, with many staying for the New Year's luncheon with our non-birding companions. An enjoyable ending to a good morning's birdwatching. Many thanks to all who took part and for sharing their observations. Altogether 53 species were seen during the field meeting.

Black-headed Gull (*Larus ridibundus*), Lady's Mile

FIELD MEETING - AKHNA DAM & OROKLINI MARSH – 10th FEBRUARY 2018

By Stavros Christodoulides

On a dusty but mild Saturday morning, nine of us, a good mix of seasoned regulars and new members, gathered at 9am at Akhna Dam, for our late winter trip to Akhna Dam and Oroklini Marsh. Mid-February is a good time to look for early spring migrants as well as winter visitors and water levels permitting, both these sites can be very productive.

On arriving, it was evident that water had recently been released into the Dam. This was less than ideal as it meant there was little habitat for wading birds while most of the reed-beds were flooded. We took a short walk near the dam wall and noted some common birds including **Linnet**, **Greenfinch** and **Chiffchaff**. We heard a couple of calling **Bluethroats** but despite some searching were unable to see them. A male **Spectacled Warbler** was much more obliging as it sang perched high on a small bush. On the lake we saw many **Coot**, a few **Little Grebe**, a **Grey Heron** but little else so we decided to try another part of the Dam.

Our second point of call was the area just south of our meeting point. Here we walked for around 45 minutes and recorded **Spanish Sparrow**, **Zitting Cisticola**, **Cetti's Warbler**, many **Song Thrushes** and **Corn Bunting**, while on the Dam itself a **Great Cormorant** and a **Yellow-legged Gull** flew over. A **Barn Swallow** was the first of the year for most participants while a pair of beautiful **Goldfinches** added some colour to our morning birding. Next stop; Oroklini.

At Oroklini, we first stopped at the Hide overlooking the main (western) end of the lake. The stark contrast between Oroklini and Akhna was immediately obvious. At Akhna, Coots aside, there were only a handful of larger birds while at Oroklini where birds are strictly protected, we were looking at hundreds of waterbirds of different species. **Shoveler** and **Teal** were the commonest species, while other numerous species included **Flamingo**, Coots, **Mallard**, **Black-headed Gull** and **Little Grebe**. A **Black-necked Grebe** was a nice find as were four **Ferruginous Ducks** and a dapper male **Pintail**. A few minutes after our arrival, a handful of **Cattle Egrets**, a common and conspicuous breeding species on the lake's tamarisks flew in while three **Black-necked Stilt**, another common breeding species, waded in the shallow edges of the lake.

Looking into the harsh light was tiring and when we felt confident that we had seen most of the birds there, we moved onto the hide on the opposite side of the lake, where the light was far better. With the sun behind us we could better appreciate the brilliant colours of some of the commoner species such as **Flamingo**, **Shoveler** and **Teal**. Birds were again plentiful and we managed to get good looks at a selection of species including **Spur-winged Lapwing**, a common but charismatic marsh denizen. Less common species included **Wigeon**, **Gadwall** and fine scope views of three **Reed Buntings**, including a smart adult male in breeding plumage.

Our final stop was the coast near Oroklini, an area of rocky breakwaters and coastline where at times a good selection of gulls and terns have been recorded. The tide was unusually low and a fair number of gulls were roosting very close to the parking area. Most were **Black-headed Gulls** with only the odd **Armenian Gull** amongst them. We ended our trip there and said our goodbyes as we reflected on what was another enjoyable morning's birding at the SE corner of the island.

FIELD MEETING – PAPHOS FOOTHILLS – 17th FEBRUARY

By Dave and Jan Walker

With heavy rain and storms overnight and the weather forecast not good at all, we surprised there were any attendees at all. Including ourselves there was a grand total of 7 including two visitors who were BirdLife Austria members Albert and Gundi who were very enthusiastic birders. We must thank the devoted participants who turned up for a very enjoyable small field trip, although there were a few light showers we did have the sun break through at times. We started with various stop offs and short walks around Armou village, immediately **Song Thrush** were flying in front of us, there were also a number of **Corn Bunting** heard that were eventually located. **Sardinian Warbler** and **Common Chiffchaff** were heard and seen with **Cetti's Warbler** only heard. Small **Common Linnet** flocks gave good views. A number of over wintering **European Stonechat** and **Black Redstart** were showing well. Despite the showers we were surprised to see a **Little Owl** drying off. **Common Wood Pigeon**, and **Eurasian Magpie** were in the area. At the last part of call near the village there were large numbers of **Common Chaffinch** and **Woodlark**. A **European Robin** proved hard to see, singing nearby but perseverance was rewarded. Other species seen were **Chukar**, **Zitting Cisticola**, **European Serin**, **Meadow Pipit**, **Eurasian Blackcap**, **Common Kestrel**, **Great Tit** and **House Sparrow**. On the way out of the village **Collared Dove** were seen.

We then moved to Episkopi located in the Ezousa Valley. At the large rocks a **Peregrine Falcon** was perched for good views around a 100 **Eurasian Jackdaw** were also present. Arriving at the picnic site further up the valley a large number of **Eurasian Siskin** were feeding on the floor and in the trees of Alder that lined the fast flowing river. A **Common Buzzard** our first raptor of the day circled overhead, a sign the weather was improving. Other species in the area were **Hooded Crow**, **Cetti's Warbler**, **Song Thrush**, **Common Chaffinch**, **Eurasian Blackcap** and a few **Barn Swallow**.

As Albert and Gundi wanted to see Finsch's Wheatear we decided to look down on Anarita Park from above the farm, here they were really excited to see not one but two male **Finsch's Wheatear**. While all of this excitement was dying down Kate then spotted male **Blue Rock Thrush** on the wall of the farm, this after everyone had searched all the nearby rocks for one. A total of 31 species seen.

BIRD PHOTO QUIZ

By Stavros Christodoulides

PHOTO # 58

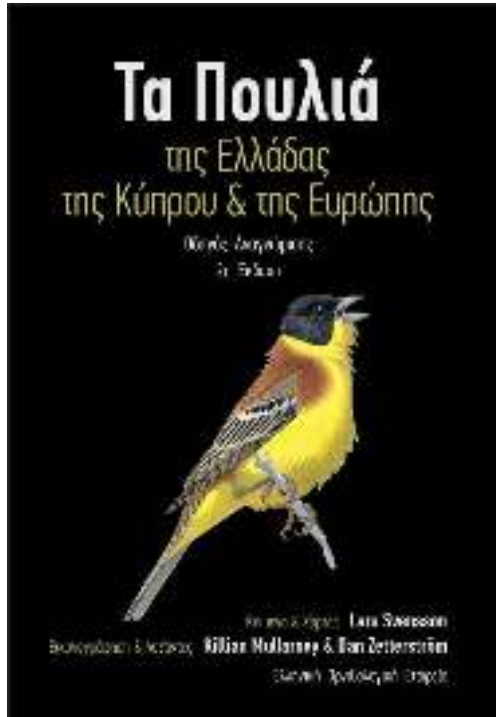

Last Month's Quiz answer

January's mystery bird is a mostly grey and white waterbird with a rounded head, long wings and rather fine bill. Its characteristic colouration, shape and behavior should easily identify it as a species of Gull or Tern, a group of largely white seabirds often commonly encountered around coasts and large wetlands.

The two can usually quite easily be separated with Terns generally showing a finer bill, longer wings and shorter neck and legs. Our mystery bird shows a thin bill and rather long wings but the long neck rules out all species of Tern. Once we determine that our mystery bird is a rather Tern-like Gull, identification becomes quite straightforward.

The relative size of the eye suggests it is a small/very small species and the all black bill should exclude our two commonest small species of Gull; Black-headed and Slender-billed. The thin bill should also exclude Mediterranean Gull and the extremely rare Franklin's Gull which can both show a dark bill in juvenile plumage. We are left with just one species of gull that perfectly fits the photograph, **Little Gull**, the world's smallest species, an uncommon winter visitor and passage migrant to Cyprus.

A – Z of Birdwatching – Agia Thekla – Agia Varvara

By June Neal

Agia Thekla, Ammochostos

Co-ordinates: 34.9923° N, 34.0140° E

This stretch of coast, near the Liopetri River, is under threat from development although is 'designated as a Special Protection Area for its significant for wintering and migrant Greater Sandplover, Βραχοπλουμίδι, *Charadrius leschenaultia*'. Thirteen were there 1 October 2012 and 17 were seen there on 25 January 2013.

A Gull-billed Tern, Γελογλάρονο, *Gelochelidon nilotica* was seen fishing along the coast on 13 January 2012 (possibly the same bird seen at Akhna Dam that winter).

In March 2013 500 Glossy Ibis, Χαλκόκοτα, *Plegadis falcinellus* were seen on passage over the Agia Thekla area, being the highest count for this species since August 2003.

In autumn Ruddy Turnstone, Χαλικονεραλλιδι, *Arenaria interpres* may be present.

'It is also among the few sites away from Kleides Islands to regularly host Audouin's Gull', Νησόγλαρος, *Larus audouinii* during the winter

Agia Trias

Coordinates: 35° 7' 15" N, 33° 57' 30" E

This stretch of coast near Protaras and the E307 attracts a variety of birds including four Red-breasted Merganser, Θαλασσοπρίστης, *Mergus serrator* seen to the east in mid February 2014.

Winter species include –

- Red-breasted Merganser, Θαλασσοπρίστης, *Mergus serrator* with three seen 20 January 2011 and a female stayed until 27 January
- Sandwich Tern, Χειμωνογλάρονο, *Thalasseus sandvicensis* may be observed in the area during October
- A Pied Kingfisher, Κήρυλος, *Ceryle rudis* was present on 7 and 21 February 2012

Agia Varvara

Coordinates: 34° 45' 0" North, 32° 30' 45"

The village is on the hillside above the Ezousas valley. Well sign-posted from the A6 highway. Most of the species seen here are found around the soak-away pools to the N of the village (when filled with water) and along the valley, orchards and wooded areas.

In spring you may find –

- Spotted Crane, Σπικτοπουλάδα, *Porzana porzana*
- Little Crane, Μικροπουλάδα, *Zapornia parva*
- Baillon's Crane, Νανοπουλάδα, *Zapornia pusilla*- with one there on 1, 12 and 15 April 2013, followed by two on 13 April 2013
- Savi's Warbler, Καλαμοτριλιστής, *Locustella luscinioides*
- Rufous-tailed Rock Thrush, Πετροκότσυφος, *Monticola saxatilis* - one was present on 22 March 2012

In winter Common Little Bittern, Βουρωδιάς, *Botaurus stellaris* may be present as in January 2013 and Eurasian Wryneck, Θερκοπούλλι, *Jynx torquilla* - which was 'a surprise find' on 4 February 2013.

Possible all-year-round sightings may include -

- Bonelli's Eagle, Σπιζαετός – Περικοσιάχινο, *Aquila fasciata*
- Northern Goshawk, Διπλοσιάχινο, *Accipiter gentilis*
- Blue Rock Thrush, Γαλαζοκότσυφος, *Monticola solitarius*
- Levant Sparrowhawk, Σαΐνι, *Accipiter brevipes*

MONTHLY WATERBIRD COUNT

January 2018

Yiannis Christodoulides

The BirdLife Cyprus waterbirds monitoring programme has been running since 2005 and covers around 70 wetlands and other waterbird sites around the island. All sites are covered at least every January (mid-winter count) and every May (breeding season count), while the more important sites are also covered in March, September and November. Key Important Bird Area (IBA) wetlands such as the island's two salt lakes, which attract large numbers of birds, are covered on a monthly basis. The monitoring programme is based on the voluntary work of a team of dedicated and experienced recorders and preliminary results are presented in the Monthly Checklist.

For January, 20 recorders covered 65 wetlands (including three coastal sites) across the island where 13138 birds, of 58 different species were recorded on the 13th and 14th of the month, as part of the International Waterbird Census (IWC).

The most abundant species was the Greater Flamingo, with more than 3100 individuals, with the second most abundant species being the Coot with just below 1400 individuals closely followed by the Northern Shoveler with just over 1200 individuals.

The wetland holding the most birds was the Larnaka Salt Lake with 2813 individuals as well as the site with the highest species abundance with 26 recorded species. Akrotiri Salt Lake was second in recorded individuals with 2514. Larnaka Sewage works and Oroklini Lake were both second in species abundance with 18 recorded species each.

10 sites (Kouklia Dam, Patriki Marsh, Akanthou Dam, Argaka Dam, Ezousas Motorway, Kouklia Soakaways, Palaichori Dam, Xyliatos Dam, Ora Dam and Lefkara Dam) had no recorded individuals.

The International Waterbird Census mid-winter count is the pinnacle of our year-round monitoring programme covering all the main waterbird sites in Cyprus.
