Cover photo: *One of the more well known winter visitors to the island, the Greater Flamingo Phoenicopterus ruber are seen on Larnaca and Akrotiri Salt Lakes as well as Oroklini and Paralimni Lakes when the water levels are suitable. These four adult birds were observed interacting on Lady's Mile in December and photographed by Andy Waller.*

COMPILATION OF MONTHLY CHECKLIST

The Monthly Checklist and Society News is compiled by Dave and Jan Walker.

We would love to hear from members and friends who would like to provide bird and bird watching related articles in future editions of the Monthly Checklist. Get in touch and let us know your ideas. Suggestions for topics could include ID pointers, great locations to visit, birding walks or drives or interesting personal birding experiences that you feel fellow readers would enjoy. Please contact Dave Walker 99915907 davidwalker@cytanet.com.cy

If you are sending photographs for inclusion in the Systematic List please send them by 18th of the month to Jane Stylianou. Every effort is made to ensure that the work of as many contributors as possible is used but inclusion cannot be guaranteed. Please send photographs in JPEG format where possible. Please send to janestycy@yahoo.co.uk. Telephone: 99558953

Birdline Operated by June Neal on behalf of BirdLife Cyprus is the bird information hotline. To hear a pre-recorded message with recent interesting bird sightings and to add your own observations, please phone 00357 25 934076.

Join the [BirdLife Cyprus Google](#) group to exchange and receive emails updating local and visiting birders about recent sightings <https://groups.google.com/forum/#!forum/birdlifecyprusbirds>

KEEP UP TO DATE AND SHARE RECENT SIGHTINGS WITH THE BIRDLIFE CYPRUS GOOGLE GROUP

Continuing BirdLife Cyprus' attempts to ensure both resident and visiting birders receive up to date information on the birds being spotted on the island, we have set up a Google Group through which group members can email in their recent sightings and bird news and receive and read those of other members.

If you would like to join please [click here](#).

Email: BirdLifeCyprusBirds@googlegroups.com

Once you are a member you can choose whether to receive all emails or check the news via the web at a time convenient to you. Visit the settings option to ensure that you get emails if you want to. It is an informal group for birders to share what is around. It cannot be checked for accuracy or be held responsible for misinformation. The group is open to both BirdLife Cyprus members and non-members alike. If you know a non-member or friend who may be interested please let them know.

Any news will also be shared with the BirdLife Cyprus BirdLine 25 934076 and the BirdLife Cyprus [Recent sightings page](#) of the website. You can also use these two resources to find out what is around if you don't want to join the Google group.

YOUR BIRDING SIGHTINGS ARE IMPORTANT. PLEASE DON'T FORGET TO SEND THEM TO THE RECORDER

Jane Stylianou

Whether you go out bird watching regularly or just enjoy noting what you see when out on a walk, any record of what you see is important to help us keep an up to date database of the birds of Cyprus.

Most people submit their records on a monthly basis. To be included in the Systematic List that appears in the Monthly Checklist please make sure that Jane receives your records by the 10th of the following month or are added to BirdTrack by that date. But don't worry if you miss the deadline, your sightings will still be added to the database and be used in compiling the annual Cyprus Bird Report. On occasions, you may be asked to provide extra details of rarer birds or of those seen out of season or away from their usual locations. This is something that happens to all observers and is not a reflection on anyone's bird watching skills! A list of the species for which a Rare Bird Report is required can be obtained from Jane.

There are several ways to make sure that your records count by submitting them to the BirdLife Cyprus Recorder, Jane Stylianou who will add them to the country database:

Use the Cyprus portal of BirdTrack <http://blc.birdtrack.net> or download our [reporting excel](#). The recorder is happy to receive your sightings by email but where possible please try to use either BirdTrack or the Excel form. Please contact her if you have any questions janesytcy@yahoo.co.uk mobile telephone 99558953.

Οι καταγραφές σας είναι σημαντικές για μας για να μπορέσουμε να κρατήσουμε τη βάση δεδομένων για τα πουλιά της Κύπρου ενημερωμένη. Για να συμπεριληφθούν οι καταγραφές σας στον Μηνιαίο Συστηματικό Κατάλογο παρακαλούμε συμπληρώστε [το έντυπο αυτό](#) και στείλτε το στην Jane την Υπεύθυνη Καταγραφών, μέχρι τις 10 του επόμενου μήνα ή ανεβάστε τις καταγραφές σας στο [BirdTrack](#) μέχρι εκείνη την ημερομηνία. Μην ανησυχείτε όμως εάν χάσετε την προθεσμία. Οι καταγραφές σας θα προστεθούν στη βάση δεδομένων και θα χρησιμοποιηθούν στην Ετήσια Ορνιθολογική Αναφορά.

Για οποιαδήποτε διευκρίνιση επικοινωνήστε με την Jane στο janesytcy@yahoo.co.uk ή στο 99558953.

CYPRUS BIRD SIGHTINGS RECORDS FOR 2018

Have you been out bird watching in Cyprus during 2018? Then please don't forget to send all your 2018 sightings in to the Recorder if you haven't already done so. They can be sent either via the Global portal of the BTO BirdTrack database <http://app.bto.org/birdtrack2/main/data-home.jsp> or on the excel form which you can either download from the BirdLife Cyprus website or the Recorder can send to you. Email lists are acceptable if you are not comfortable with either of those two methods. Users of the eBird recording scheme can download their sightings into an excel file and forward them in that format if they want.

So that the 2018 database can be completed, it would be appreciated if they are received by February 10th 2019. If you are unable to meet that deadline but still have 2018 records to submit please let the Recorder know.

Make your birdwatching count and ensure that your sightings are included in the 2018 country database. Please note that the only way for your records to be included in the database is to ensure that the Recorder receives them. Unfortunately, she is unable to include those only noted on various social media sites, 'round-robin' emails, "BirdLine" etc.

Cyprus Bird Report

2017

The Cyprus Bird Report 2017 will soon be available. The report contains 53 colour photos, the 2017 Systematic List of 308 observed species or recognised forms which was compiled from nearly 69,000 records and the 2017 Ringing report. Plus papers on the first White-eyed Gull in Cyprus; the study of migration with Cyprus Wheatears; the BirdLife Cyprus 2017 monitoring programmes; the breeding success, wintering ecology and migratory behaviour of Eleonora's Falcon in Cyprus and breeding Cyprus Scops Owl in a Cyprus garden. The Report includes species charts and tables and a full Cyprus bird List. The front cover features a male White-throated Robin photographed at Cape Greco. The Report will be sent automatically to those BirdLife Cyprus members whose subscription includes it. Extra copies can be purchased if required by contacting the BirdLife Cyprus office.

SCHEDULE OF BIRDLIFE CYPRUS FIELD MEETINGS AND ACTIVITIES

The Winter/Spring schedule 2019

*For field trips, please don't forget your flask of coffee and sandwiches. Although their higher clearance is an advantage, 4x4s are not necessary for any of the field trips unless **stated otherwise** below. The schedule of field trips is drawn up well in advance of the actual dates. The schedule will only change due to an extraordinary event. However, it is sometimes necessary to assign a different leader. **Please note certain field trips require pre booking with the leader to ensure there are suitable conditions at the site for the time of year and sufficient participation (These will be marked Pre Book). Participants in field trips are always advised therefore to check with the BirdLife Cyprus website in case of any late changes or cancellations.** Whilst BirdLife Cyprus does not charge for attending field trips, any voluntary donation to its conservation work would be very welcome. Please present your gift to the leader on the day.*

*To assist new members and visiting birders, who have access to a GPS or Google Earth, to locate our 'meeting points more easily', **we have introduced coordinates into the following schedule.** Simply copy and paste the coordinates into the "Search bar" in "Google Earth" and click on it. For most instruments it is unnecessary to type in the degree and minute symbols (° & ') or the N and E letters.*

Important Announcement: Participation in BirdLife Cyprus field meetings is at one's own risk. BirdLife Cyprus accepts no liability or responsibility for accidents, illness, injury or loss or damage to property that might occur. Field trips require light to moderate exercise. Please contact the field trip leader for more information on difficulty, distances and terrain of a particular field trip.

March 2019

Wednesday 6th March: Akrotiri Peninsula

Leader: Victor Tjernberg. Mobile: 96107299

Late winter visitors, water birds and spring migrants.

Meet 8.30 am, (Please note the earlier start time) Viewing hide at Zakaki Marsh.

Google Maps link: <https://goo.gl/maps/nY2GENJHjfx>

Saturday 16th March: Paphos Lighthouse

Leader: Ian and Kate Bloomer. Mobile: 99265661

Early Spring migrants.

Meet 8.30 am (please note the earlier start time), Entrance of Archaeological area by the Paphos Harbour Car Park. Google Maps Link <https://goo.gl/maps/K7eKYqWh7LD2>

Saturday 23th March: Larnaca Sewage Works & Oroklini Marsh PLEASE PRE BOOK WITH LEADER

Leader: Martin Hellicar. Mobile: 99907893.

Spring migrants and waterbirds.

Meet at 9.00 am, Larnaca Sewage Pool hide.

Google Maps link: <https://goo.gl/maps/xW5dk5txAN62>

April 2019

Friday 5th April - Sunday 7th April: Karpasia Peninsula

Spring migrants and rare residents.

Leader: Melis Charalambides. Home Tel: 22632155, Mobile: 99653205

Meet 11.00 am west end of Akhna Dam Wall.

Google Maps link: <https://goo.gl/maps/cYJi754DpHR2>

Please book in advance with Melis Charalambides.

Saturday 13th April: Asprokremmos Dam and Mandria

Leader: Alan Crane. Mobile: 99276310

Spring migrants.

Meet at 9.00 am, Asprokremmos Dam car park.

Google Maps link: <https://goo.gl/maps/F23CnS5iZA42>

Saturday 20th April: Cape Greko

PLEASE PRE BOOK WITH LEADER

Leader: Stavros Christodoulides: Mobile: 99425050

Spring Migrants, (please note new meeting point.

Meet 8.00 am, Capr Grko Environmental Centre

Google Maps Link: <https://goo.gl/maps/zPRPnzJoxB2>

Friday 26th April - Monday 29th April (Cypriot Easter)

Saturday 27th April: Arodes and Androlikou Akamas Villages

Leader: Dave and Jan Walker: Mobile: 99915907

Meet 9.00 am Pano Arodes square, St. Kelandion Church

Google Maps Link: <https://goo.gl/maps/emfrqyYToan>

May 2019

Saturday 4th May: Akrotiri Peninsula.

Leader: Victor Tjernberg. Mobile: 96107299

Late spring migrants and water birds.

Meet 8.30 am, Akrotiri Marsh (Phassouri Reed beds).

Google Maps link: <https://goo.gl/maps/oaCQat3x7tH2>

Saturday 18th May: End of Season Get Together Lunch

12.30 pm at Kyrenia Restaurant, Avdimou.

Google Maps Link: <https://goo.gl/maps/CcfiYnirUoH2>

For booking please contact: Mrs Loria Phylakti, Tel: Mobile: 99413383, email: loriaph@gmail.com

Larnaca Sewage Works field trip report – 19th January 2018

By Martin Hellicar

It was hardly the most auspicious of starts to the outing. The trip leader's vehicle was making 'funny noises' on the way down from Nicosia, so I had to go back, jump into another set of wheels and try again. Net result was the trip leader was last at the hide, where half-a-dozen birders had already gathered. But the birds made up for this hiccup, with Little Gull, Slender-billed Gull, great views of a splendid flock of Golden Plovers, a rich variety of duck species and Curlew the highlights.

At the first stop, the Larnaca Sewage Works, there was an impressive collection of wintering ducks: **Wigeon, Pochard, Gadwall, Ferruginous Duck**, plus good numbers of **Mallard** and especially **Shoveler** and **Teal**. We did not see the usual wintering flock of White-fronted Geese, but we did get the usual **Cormorant, Coot, Little Grebe** and good numbers of **Black-necked Grebe** were picked out. We also got **Great Crested Grebe**, thus completing the 'wintering Grebes set'. There were quite a few **Flamingos** and also marauding **Marsh Harriers**, but the **Little Gull** was not picked up till the 'return' visit to the hide, a bit later in the morning and after the airport coast had been explored. But the world's smallest gull was more than worth the wait...!

Hooded crow, White Wagtail, Stonechat, Crested Lark, Chiff-chaff, Sardinian Warbler, Black Redstart and **Meadow Pipit** were also added to the list from the area around the hide.

Down the road at Spyro's Pool, we found a flock of around 120 **Golden Plovers** in plain view and performing stunning 'flyovers'. We also saw **Redshank, Slender-billed Gull, Black-headed Gull**, more **Flamingos, Lapwing, Kestrel** and **Greenfinch** and **Goldfinch**.

At the end of the track behind the airport fence, we spotted a lone **Curlew**, though the bird was far enough away to have us working for a bit, trying to decide between Curlew and Whimbrel.

Most participants then went on to enjoy the New Year Get-together event at Makenzie Beach.

FIELD MEETING - AKROTIRI PENINSULA - 26th January 2019

by Victor Tjernberg

We all met up at Akrotiri Marsh by the hide, all in all 13 people participated on this sunny day's field trip. Almost immediately a **Marsh Harrier** swept in over the reeds looking for some breakfast. Down by the hide we were greeted not so much by birds but by a big cattle who was very interested in what we were doing there. A few **Coot** were messing around in the water outside the hide and we could enjoy the song from a couple of **Cetti's Warblers** from the reed. Along the path between the hide and the parking **Meadow Pipits** said hello with their characteristic "*ist-ist-ist*" and a cracking male **Stonechat** was sunbathing on a piece of straw, swaying from side to side in the moderate wind.

We left the hide and continued west towards the sea. Along the road a beautiful **Woodlark** flew up and perched on the roof of a shed next to the road, showing nicely for a moment. We then parked our cars at the Old Rabbits Farm and walked the road down toward the Gravel Pits a few hundred meters. Here we had very good observations of several Marsh Harriers that came really close to us. A male **Blackcap** created a lovely backdrop with his song, enhancing the feeling of spring in the air. Some **Kestrels** came and went in their search for a snack and a few **Zitting Cisticolas** and **Sardinian Warblers** took turn in chatting away behind us as well.

We then continued towards Bishop's Pool with a short stop by the Environmental Center for a look out over the Salt Lake. A few **Greater Flamingos** could be seen in the distance and the greenest of **Greenfinch** males sang from the top of his lungs from a treetop next to us. When turning in on the road up towards Bishop's Pool numerous **Song Thrushes** took off from the bushes next to the road. In the water we saw some **Ferruginous Ducks**, **Teal**, **Little Grebe** together with one **Shoveler** and one **Garganey**. After a cup of coffee we took a walk around the east part of the lake and a few **Robins** together with several Song Thrushes created a beautiful symphony to listen to. A few more Cetti's Warblers taunted us with their song but we did never manage to see one out in the open. But all of a sudden a little brown warbler came out from the reeds and after a few seconds it also started to sing a familiar tone, a **Reed Warbler**! Not a common bird in January in Cyprus so this was an interesting sighting!

After a tip-off we got word about two juvenile **White Pelicans** that were sitting on a field behind the Environmental Centre so we packed our cars and left for a chance of seeing these big birds up close. We were not disappointed. The two birds were sitting next to each other on a plowed field really close to the road so everyone (together with several non-birders) got a good look at them. At this point we were all a bit tired and we decided to call it the day. Together we managed to see 42 species this day.

BIRD PHOTO QUIZ

Stavros Christodoulides

PHOTO # 69

Last Month's Quiz answer

Last month's quiz photo is a group of identical or very similar looking flying birds, suggesting we are either dealing with a single bird species or similar/related species. Although in our photo the birds look small and not much detail can be made out, enough can be seen to safely identify them.

Pointed wings, short, square tail, overall colouration and the fact that they are moving around in a flock suggest that we are dealing with a species of wader. Furthermore, the short bill, short neck and rather short legs (not protruding beyond the tail) suggest that this is a species of Plover. Once this is established, identifying the species is rather straightforward. The golden yellow upperparts and chest, white belly and distinct supercilium all point towards our mystery birds being Golden Plovers. Two species occur on the island, one, European Golden Plover, is a locally common winter visitor while the other, Pacific Golden Plover, is a rare vagrant. The two can most easily be separated in flight, Pacific showing longer legs, clearly extending beyond the tail, and greyish underwings (axillaries). Our mystery birds show white underwings and shorter legs, making them winter plumaged **European Golden Plovers**.

A-Z of Cyprus Birdwatching

By June Neal

Alula

The small 'bastard' wing on the leading edge of the wing can be extended to form a slot which smooths the air-flow over the wing surface and maintains the bird's stability, so controlling stall tendency when flying at very low speed. This is especially noted when a bird descends to a perch. Spreading its wings and tail will produce a brake and by beating its wings against the direction of movement the bird controls its descent but if there's a tendency to stall the alula is spread before the moment the legs reach down for the perch.

Below is a photograph of an Isabelline Wheatear, Αμμοσκαλιφούρτα, *Oenanthe isabellina* taken by Ian Bloomer on 12 February 2018 at Mandria (Paphos). The dark patch on the leading edge of its wing is the alula. In flight, very often the alula on the Common Kestrel, Κίτρος, *Falco tinnunculus* is clearly visible.

Amathus, Limassol

Coordinates: 34°42'45.00" N, 33°08'30.84" E

The hillside above, and the ruins below, provide opportunities to resident breeding birds such as -
Little Owl, Κουκουφιάς, *Athene noctua*
Sardinian Warbler, Τρυτοβάτης, *Sylvia melanocephala*
Cyprus Warbler, Τρυτομάζης, *Sylvia melanocephala*

Migrants likely to be seen include –

Great Cormorant, Κορμοράνος, *Phalacrocorax carbo* – Large migrating flocks may be seen from this site: 55 on 25 March 2012; c140 15 March 2010 and c130 on 19 March 2010

Mistle Thrush, Τριζάρα, *Turdus viscivorus* in spring

Rufous-tailed Rock Thrush, Πετροκότσυφος, *Monticola saxatilis* – one noted in the ruins on 21 April 2013

Hooded Wheatear, Σκουφοσκαλιφούρτα, *Oenanthe monacha* – a male was present for a few hours 29 March 2011

Winter visitors and migrants among the ruins:

Blue Rock Thrush, Γαλαζοκότσυφος, *Monticola solitaries* may be found during winter - Reported on six dates 4 February to 25 March 2014 including two records of single males and two reports of single females

Northern Wheatear, Σταχτοσκαλιφούρτα, *Oenanthe oenanthe* – 24 were observed on 20 September 2014

Eastern Black-eared Wheatear, Ισπανική Σκαλιφούρτα, *Oenanthe hispanica melanoleuca* have also been noted – a single near the radio masts in Autumn 2014

MONTHLY WATERBIRD COUNT

January 2019

Markos Charalambides

The BirdLife Cyprus waterbirds monitoring programme has been running since 2005 and covers around 70 wetlands and other waterbird sites around the island. All sites are covered at least every January (mid-winter count) and every May (breeding season count), while the more important sites are also covered in March, September and November. Key Important Bird Area (IBA) wetlands such as the island's two salt lakes, which attract large numbers of birds, are covered on a monthly basis. The monitoring programme is based on the voluntary work of a team of dedicated and experienced recorders and preliminary results are presented in the Monthly Checklist.

For May, 19 recorders covered 67 wetlands (including two coastal sites) across the island where 16463 birds, of 62 different species were recorded.

The most abundant species was the Greater Flamingo with 4904 individuals. The second most abundant species being the Black-Headed Gull with 2696 individuals followed by the Shoveler with 2082 individuals.

The wetland holding the most birds was the Larnaka Salt Lake with 4158 individuals followed by Mia Milia Sewage Works with 2279 individuals. The site with the most recorded species was Larnaka Salt Lake was first in species abundance with 24 recorded species followed by Mia Milia sewage works with 21 species.

In total, fifteen sites had no waterbirds present. Acheleia dam only had one individual recorded. Ayios Ambrosios Dam was not surveyed as it was not accessible.
